

## ENVIRONMENT AND HIGHWAYS CABINET BOARD

## Immediately Following Scrutiny Committee on THURSDAY, 10 DECEMBER 2015

## COMMITTEE ROOMS A/B - NEATH CIVIC CENTRE

## <u> PART 1</u>

- 1. To agree the Chairperson for this Meeting.
- 2. To receive any declarations of interest from Members.
- 3. To receive the Minutes of the previous Environment and Highways Cabinet Board held on 29 October 2015 and the Special Meeting held on 6 November 2015 (Pages 5 - 12)

## To receive the Report of the Head of Planning

4. Air Quality Updating and Screening Assessment 2015-2021 (Pages 13 - 18)

## To receive the Report of the Head of Engineering and Transport

- 5. Fleet Asset Register (Pages 19 36)
- 6. Highway Structures Asset Protection and Maintenance (Pages 37 54)
- 7. List of Approved Contractors (Pages 55 62)
- 8. MOT Testing Facility at Tregelles Court (Pages 63 72)

## To receive the Joint Report of the Head of Engineering and Transport and the Head of Streetcare

9. Quarter 2 Performance Indicators - Environment and Highways (Pages 73 - 84)

## To receive the Report of the Head of Streetcare

- 10. Missed Bin Policy (Pages 85 90)
- 11. Highway Asset Management Plan (Pages 91 196)
- 12. Flood Risk Management Plan 2015-2021 (Pages 197 220)

# To receive the Report of the Head of Corporate Strategy and Democratic Services

- 13. Urgency Action 1271 Experimental Traffic Orders, Crymlyn Burrows (Pages 221 - 222)
- 14. <u>To receive the Forward Work Programme 2015/16</u> (Pages 223 - 224)
- 15. Any urgent items (whether public or exempt) at the discretion of the Chairman pursuant to Statutory Instrument 2001 No 2290 (as amended).

## S.Phillips Chief Executive

Civic Centre Port Talbot

Thursday, 3 December 2015

## **Cabinet Board Members:**

**Councillors:** E.V.Latham and Mrs.S.Miller

#### Notes:

- (1) If any Cabinet Board Member is unable to attend, any other Cabinet Member may substitute as a voting Member on the Committee. Members are asked to make these arrangements direct and then to advise the committee Section.
- (2) The views of the earlier Scrutiny Committee are to be taken into account in arriving at decisions (pre decision scrutiny process).

This page is intentionally left blank

## Agenda Item 3

## EXECUTIVE DECISION RECORD

## **CABINET BOARD - 29 OCTOBER, 2015**

## **ENVIRONMENT AND HIGHWAYS CABINET BOARD**

## Cabinet Board Members:

Councillors: E.V.Latham (Chairperson) and A.N.Woolcock

#### Officers in Attendance:

D.Griffiths, M.Roberts and Mrs.T.Davies

## 1. APPOINTMENT OF CHAIRPERSON

That Councillor E.V.Latham be appointed Chairperson for the meeting.

#### 2. <u>MINUTES OF THE PREVIOUS ENVIRONMENT AND HIGHWAYS</u> CABINET BOARD HELD ON 17 SEPTEMBER 2015

Noted by the Committee.

## 3. <u>ALLEGED PUBLIC FOOTPATH - GLAN YR AFON RD TO FOOTPATH</u> <u>NO. 194, YSTALYFERA</u>

#### **Decision:**

That a Modification Order be made under the provisions of the Wildlife and Countryside Act 1981 to show the path F-X-C-D-E (F-E) (as detailed within the circulated report) as a public footpath, and if no objections are received to confirm the same as an unopposed Order.

## **Reason for Decision:**

Under common law it could be concluded the path had been accepted by at least two of the present landowners including this Council. Access has

also been alleged to have been enjoyed by eight people prior to 1960 and so the path has acquired a reputation as one that could be used by the public over a period in excess of 50 years.

Consequently a Modification should be made to recognise the route between points F-X and between C-E as a public footpath only. The section X-C has already been dedicated as a public footpath but has yet to be added to the Definitive Map as it does not connect to any other public path at either of its points of termini. Consequently as no legal event modification order was made for this section of path to have it included to the Definitive Map the entire length of the claimed route F-X-C-D-E (F-E) could be included into the one modification order.

## Implementation of Decision:

The decision will be implemented after the three day call in period.

#### **Consultation:**

This item has been subject to external consultation.

## 4. <u>ALLEGED PUBLIC FOOTPATH - HODGSON'S RD TO FOOTPATH</u> <u>NO. 194, YSTALYFERA</u>

#### **Decision:**

That a Modification Order be made to register a public path via the route A-B-C-D-E (as detailed in the circulated report) and if no objections are made to confirm the same as an unopposed order.

## Reason for Decision:

There is no evidence to show why those who claim to have enjoyed walking the route have been challenged until the installation of the fence in 2005. It should therefore be assumed use was uninterrupted throughout the period 1985-2005. Secondly the use has been sufficiently widespread to reflect the public at large.

## **Implementation of Decision:**

The decision will be implemented after the three day call in period.

## **Consultation:**

This item has been subject to external consultation.

## 5. <u>ALLEGED PUBLIC FOOTPATH - HODGSON'S RD TO THE 'WEIR',</u> <u>YSTALYFERA</u>

## **Decision:**

That no Modification Order be made and the application be refused.

## Reason for Decision:

Whilst there is sufficient evidence of use, that use is limited to persons residing in one street and confined to a small area within that street. There can be a presumed dedication to the public for a limited purpose but there cannot be a presumed dedication to a limited part of the public.

Secondly use by the public alone is not sufficient to show that there has been a presumed dedication under common law. Whilst two of the landowners, other than this Authority, had originally agreed to enter into a dedication agreement, one has now declined to do so. In addition, the path between points K-X (as detailed within the circulated report) was never kept open and so it is difficult to conclude the Authority showed any intention to dedicate the path.

## Implementation of Decision:

The decision will be implemented after the three day call in period.

## **Consultation:**

This item has been subject to external consultation.

## 6. DIVERSION OF FOOTPATH NO 237, YSTALYFERA

## **Decision:**

That a diversion order be made under Section 119 of the Highways Act 1980, to divert the path from A-B-C to A-C (as detailed in the circulated report) and if no objections are received to confirm that same as unopposed.

## Reason for Decision:

It is considered the tests under Section 119 to the Highways Act 1980 can be satisfied, and so the diversion order be made.

#### **Implementation of Decision:**

The decision will be implemented after the three day call in period.

## Consultation:

This item has been subject to external consultation.

## 7. OUTCOME OF APPEAL TO WELSH MINISTERS

#### **Decision:**

That the report be noted.

## 8. PROPOSED DIVERSION OF ALLEGED PUBLIC FOOTPATH, YSTALYFERA

#### **Decision:**

That a Diversion Order be made under S.119 of the Highways Act 1980 to re-route the path from A-C-E to A-B1-D (as detailed within the circulated report) and if no objections are received to confirm the same as unopposed - this diversion order can only be made if and when the route F to E referred to in paragraph 3 above is confirmed as a public path.

## Reason for Decision:

The diversion will secure the public with a link between Hodgson's Road and the river walk and Footpath No. 194. It also provides those residents of the housing development with a means of accessing Hodgsons Road on foot. Therefore it could be said to be in the interests of the public and the landowners and occupiers of the site.

## Implementation of Decision:

The decision will be implemented after the three day call in period.

## Consultation:

This item has been subject to external consultation.

## 9. PROPOSED PROHIBITION OF WAITING AT ANY TIME ORDER -CHURCH ROAD/NEW STREET, GODRE'R GRAIG

#### **Decision:**

That the objections be overruled and the Prohibition of Waiting at Any Time Order at the junction of Church Road and New Street, Godre'r Graig, be implemented as advertised and the objectors informed accordingly.

## Reason for Decision:

The scheme is necessary to prevent indiscriminate parking at the junction of Church Road and New Street in the interest of road safety.

## **Implementation of Decision:**

The decision will be implemented after the three day call in period.

## Consultation:

This item has been subject to external consultation.

## 10. DRAFT ROAD SAFETY STRATEGY 2015-2020

#### **Decision:**

That authority be granted to consult on the Draft Road Safety strategy 2015 - 2020.

## Reason for Decision:

To obtain feedback from the consultation process in order to inform and finalise a Road Safety Strategy 2015 - 2020 for adoption by Council.

## Implementation of Decision:

The decision will be implemented after the three day call in period.

## **Consultation:**

The Strategy document will be the subject of external consultation.

## 11. GRIT BIN 3 YEAR REVIEW

## **Decision:**

That the existing policy be continued, subject to review in a further 3 years.

## **Reason for Decision:**

To review policy in line with previously determined timescales.

#### **Implementation of Decision:**

The decision will be implemented after the three day call in period.

## 12. FORWARD WORK PROGRAMME 2015/16

## Decision:

That the Forward Work Programme 2015/16 be noted.

## CHAIRPERSON

## EXECUTIVE DECISION RECORD

## **CABINET BOARD - 6 NOVEMBER, 2015**

## **ENVIRONMENT AND HIGHWAYS CABINET BOARD (SPECIAL)**

## Cabinet Board Members:

Councillors: Mrs.S.Miller (Chairperson) and A.N.Woolcock

#### Officers in Attendance:

D.Griffiths and Mrs.T.Davies

## 1. APPOINTMENT OF CHAIRPERSON

Agreed that Councillor Mrs S.Miller be appointed Chairperson for the meeting.

## 2. **PARKING REVIEW 2015-16**

#### **Decisions:**

- That the proposed tariff structures (as detailed within the circulated report) be advertised and subject to there being no objection, that the new tariff structure be implemented;
- 2. That Milland Road car park in Neath be changed from a long stay to a short stay car park;
- 3. That free Christmas parking be agreed in Neath, Port Talbot and Pontardawe Pay and Display Car Parks from Saturday 12 to Sunday 27 December inclusive.

#### **Reasons For Decisions:**

1. To encourage car park usage in the Neath and Port Talbot town centres;

2. To support businesses in the southern end of the town centre by changing Milland Road car park to short stay;

- 28 -

3. To attract increased numbers of Christmas shoppers over the festive period.

## **Implementation of Decisions:**

The decision is an urgent one for immediate implementation, following the consent of the relevant Scrutiny Chair and is therefore not subject to the call-in procedure.

#### **Consultation:**

This item has been included in the Forward Work Programme and will be subject to external consultation.

## CHAIRPERSON

## Agenda Item 4

## NEATH PORT TALBOT COUNTY BOROUGH COUNCIL

Environment and Highways Cabinet Board 10 December 2015

> Report of the Head of Planning Nicola Pearce

#### **Matter for Decision**

Wards Affected: All Wards

## 2015 Air Quality Updating and Screening Assessment

#### **Purpose of Report**

1 To inform members of the results of pollution monitoring carried out during the calendar year of 2014, and obtain approval to place a copy of the report on the Council's website and send copies to the Welsh Assembly Government.

## **Executive Summary**

- 2 Appended to this report is the 2015 Updating and Screening Assessment Report (USA) for Neath Port Talbot County Borough Council (see Appendix 1).
- 3 This Air Quality report fulfils the requirements of the Local Air Quality Management (LAQM) process as set out in Part IV of the Environment Act (1995), the Air Quality Strategy for England, Scotland, Wales and Northern Ireland 2007 and relevant Policy and Technical Guidance documents. The LAQM process places an obligation on all local authorities to regularly review and assess air quality in their areas and to determine whether or not the air quality objectives are likely to be achieved.

## Background

4 Updating and Screening Assessment (USA) reports are produced by the Council every three years, with the most recent having been produced in 2012. Progress Reports are required in the intervening years. USA reports should cover: new monitoring data; new objectives; new sources or significant changes to existing sources; other changes that might affect air quality.

- 5 The Council opts to include information on non-LAQM pollutants in addition to the more narrow LAQM range of pollutants required for inclusion in LAQM reports. LAQM USA reports are required to be provided to WAG as the devolved administration has responsibility for compliance with national air quality objectives.
- 6 The report presents the results of pollution monitoring data collected during the calendar year 2014. The data includes results from continuous and non-continuous equipment, some of which is supplied to national pollution monitoring networks. Conclusions are drawn about air quality based upon this information.
- 7 The report follows the format stipulated by the Welsh Government and is 144 pages long. The report will be available on the Council's website along with all previous air quality management reports. The report is summarised below.

## Summary of the 2015 USA Report

- 8 The Updating and Screening Assessment covering the period up to the end of 2014 has identified the need to proceed to a Detailed Assessment for nitrogen dioxide (NO2) at Victoria Gardens, Neath.
- 9 Neither the long-term or short-term Air Quality Objectives for PM10 were breached in Port Talbot.
- 10 There were no exceedances of Air Quality Objectives for sulphur dioxide (SO2), lead (Pb) or carbon monoxide (CO).
- 11 Fine particulates of less than 2.5 microns in size (PM2.5) easily complied with the EU Target which is to be complied with by 2015.
- 12 Ozone is not covered by Local Air Quality Management because trans-boundary pollution can have a significant effect upon local results. Neath Port Talbot, like other parts of the country, experiences significant numbers of exceedances of the UK air quality standard. The trend is one of gradual improvement over time.

- 13 Concentrations of polyaromatic hydrocarbons exceed the UK Air Quality Objective of 0.25 ng/m3, but are less than the EU Target value of 1 ng/m3. The trend line shows that concentrations are increasing over time. Emissions of polyaromatic hydrocarbons are mainly from the steelworks. Natural Resources Wales is the regulator and is aware of the results.
- 14 Arsenic and cadmium easily comply with the EU Target, both in Port Talbot and Pontardawe.
- 15 Nickel concentrations comply with the EU Target at all locations in Neath, Port Talbot and Pontardawe, except Tawe Terrace and Pontardawe Leisure Centre. Nickel levels increased at these locations during 2014. The Wall Colmonoy site in Pontardawe will continue to be the focus of investigations aimed at compliance with the EU Target.
- 16 The highest rates of fallout of large particles (nuisance dust) were once again measured in Port Talbot at Prince Street and Port Talbot Fire Station. The highest ever fallout rates were recorded at the latter location with near record levels at Prince Street. This information is shared with Natural Resources Wales, which regulates activities at the steelworks.
- 17 Unusually, the highest number of PM10 exceedances was measured at the Little Warren site, which is outside the AQMA. Normally the number of exceedances is greatest at monitoring stations in the central part of the AQMA i.e. Prince Street and Port Talbot Fire Station. It is possible that this may be a consequence of unusual prevailing wind directions causing emissions from the steel works to impact at a different location. The acquisition of further data will shed more light on this.
- 18 There were no exceedances of the Air Quality Objective for PM10 outside or within the Air Quality Management Area (AQMA), however it is not considered to be appropriate to revoke or modify the AQMA at this time.
- 19 The next actions to be taken will be to:
  - Submit a LAQM Progress report.

• Submit a LAQM Detailed Assessment of NO2 at the junction of Victoria Gardens and Cimla Road in Neath. This shall be carried out in respect of the long-term Air Quality Objective.

## **Financial Impact**

20 There are no implications for financial impact on this item.

## Equality Impact Assessment

21 A Screening Assessment has been undertaken to assist the Council in discharging its Public Sector Equality Duty under the Equality Act 2010. After completing the assessment it has been determined that this proposal does not require an Equalities Impact Assessment.

## Workforce Impact

22 There are no workforce impact implications with actions identified within the USA report to be undertaken by Officers within the existing Pollution Control team.

## Legal Impact

23 There are no legal impact implications.

## **Risk Management**

24 There are no implications for risk management on this item.

## Consultation

25 There is no requirement for external consultation.

## Recommendation(s)

- 26 That the contents of the 2015 2015 Updating and Screening Assessment Report are noted.
- 27 That the 2015 Updating and Screening Assessment report is made available to the public and other stakeholders via the Council website and a copy sent to the Welsh Assembly Government for information.

## Reason for Proposed Decision(s)

28 To provide information about air quality in accordance with legislative requirements.

#### Implementation of Decision

29 The decision is proposed for implementation after the three day call in period.

## Agenda Item 5

## NEATH PORT TALBOT COUNTY BOROUGH COUNCIL

## CORPORATE MANAGEMENT GROUP Draft Report for Environment and Highways Cabinet Board

10 December 2015

## Report of the Head of Engineering & Transport D. W. Griffiths

Matter for Information

Wards Affected: All

Fleet Asset Register

#### Purpose of Report

1 To provide Members with information on the Fleet Asset Register.

#### **Executive Summary**

2 The Fleet Asset Register is a complete list of all Council owned vehicles and plant currently held in all departments throughout the Council. It provides up to date accurate data which is taken from the Fleet Management system. This is used to compare the Fixed Asset Register maintained by Finance and records the gross book value of vehicles and plant. This is updated for acquisitions, disposals and annual depreciation charges to provide the current value of vehicles and plant.

## Background

3 When preparing the annual Vehicle Fleet Replacement Programme a new asset register report is run, vehicles which fall into that year's timescale for replacement which is based on their individual run out dates are included in the replacement programme. A detailed report for vehicle renewals is prepared in preparation for Board approval.

- 4 The asset register report incorporates a large amount of detailed information, however the format used below is what is used by fleet and finance to compare and match current assets.
- 5 The asset register provides Fleet and Finance with an idea of the projected cost of renewals for the coming year which enables more accurate budget setting and ensures funds are in place for new purchases.

## 6 Asset Register Format

- Vehicle Departments; These departments are as they appear on the fleet system and include a large range of departments across the Council.
- Fleet Numbers;

This is the individual number given by fleet to identify the asset as soon as the item is procured, inherited or brought into the Authority.

• Registration;

The vehicle registration as it appears on the vehicle/plant and on its registration documents.

- Make/Type; The items make type and any model number.
- Purchase Method;

States how the item was purchased i.e. accessed to vehicle or plant renewals fund, prudential loans, contract hire agreements over set terms, lease hire agreements, or outright purchased through grant funding etc. The contract hire and lease items are left on this report as we currently control these items however they are not a direct asset of the Authority.

- Purchase Date; The date the item first came onto the fleet system.
- Purchase Cost; The total capital cost paid for the asset when new.
- Run Out Date;

When the vehicle is due for replacement, some are run over if cost effective or decisions on services are being made and other may not be replaced. (Appendix1)

## **Financial Impact**

- 7 The financing costs of vehicle or plant acquisitions will be a charge on the relevant sections operating account, in each case the means of acquisition will be agreed between the Fleet Manager and user section.
- 8 All the vehicles/plant are replacements to the existing fleet, a budget is already in place to fund the costs of vehicle purchases over the vehicles life so there are no financial implications.

## Equality Impact Assessment

9 Screening Assessment has been undertaken to assist the Council in discharging its public sector duty under the Equality Act 2010. After completing the assessment, it has been determined that this function does not require a full Equality Impact Assessment.

## Workforce Impact

10 This has a positive impact on staff as they will be operating safe and efficient vehicles as they are replaced.

## Legal Impact

11 No legal risk to the Authority.

## Risk Management

12 The Fleet Asset Register is periodically checked against the Fixed Asset Register maintained by Finance to ensure that all assets owned by the Authority are accounted for.

## Consultation

13 There is no requirement under the Constitution for external consultation on this item.

## Recommendation

14 For information purpose only.

## **Reason for Proposed Decisions**

15 For information purpose only.

## Implementation of Decision

16 For information purpose only.

## Appendices

Appendix 1: Copy of Asset Register

## List of Background Papers

None

## Agenda Item 6

## NEATH PORT TALBOT COUNTY BOROUGH COUNCIL

## CORPORATE MANAGEMENT GROUP

## Draft Report for Environment and Highways Cabinet Board

10 December 2015

## Report of the Head of Engineering & Transport D. W. Griffiths

Matter for Decision

Wards Affected: ALL

## Highway Structures Asset Protection and Maintenance

#### Purpose of Report

- 1 To update Members of progress on the County Bridge Assessment, Strengthening and Maintenance Programme and the implementation of the Code of Practice for the Management of highway structures, footbridges and other public rights of way.
- 2 The management of landslips and carriageway edge failures.

## **Executive Summary**

3 This report provides an update on the progress in this important area and sets out the challenges to be addressed if the County's Highway Structure Assets are to be maintained in an appropriate condition in accordance with the Code of Practice and the standards set down in the Highways Asset Management Plan.

## Background

4 Members will recall the County Bridge Strengthening Report and Presentations to the Environment & Highways Scrutiny Committee in February 2012 highlighting 'at-risk' structures and a programme of future management. 5 This report provides the current status, highlighting emerging liabilities affecting highway structures.

## Progress Report on Bridge Assessment and Strengthening

6 In summary, the introduction of the 40 Tonne Truck to the Highway Network in 1999 prompted the assessment of 201 highway structures built before 1973.

Since February 2012; Six bridges were strengthened in 2013/14 Eight bridges were strengthened in 2014/15

- 7 Overall, up to the end of December 2015 of the 183 no. assessments carried out (Appendix A):-
- 56 bridges passed the assessment.
- 116 bridges originally failed their assessment, and have been strengthened, to meet current Highway Loading Standard requirements.
- 10 bridges are designated as sub-standard and are currently unable to sustain the current Highway Loading Standard and require strengthening or replacement.
- 1 bridge has been closed to traffic.
- 5 bridges are programmed to be strengthened as part of the rolling programme 2015/16.
- There are 19 outstanding bridge assessments. These will be completed by April 2017, subject to resources. In general they are smaller bridges on unclassified roads and do not represent a major risk (Appendix B).

## Management of Sub-Standard Structures

8 A routine inspection process is in place to monitor all substandard bridges. Assessment pro-formas for all sub-standard bridges are updated in accordance with the latest Design Code (BD 79/06 – The Management of Sub-Standard Highway Structures). 9 The 19 outstanding bridges that require assessment will be added to the monitoring list.

#### Other Bridges Issues

- 10 There are a number of actions to be implemented in accordance with the Code of Practice for the Management of Highway Structures as follows:
- i) Complete the survey of existing retaining walls.
  - a) Update the system to record all new walls and structures built by private developers;

Preparation is ongoing. Adoption, maintenance liabilities, commuted sums and approved construction types are issues to be resolved. It is important to ensure that the Authority does not take on additional liabilities from developers without adequate funding to deal with the additional assets.

- b) In accordance with the Code of Practice determine maintenance liabilities for 1,831 retaining walls.
- ii) Currently 457bridges are subject to a general inspection. However, due to the limited resources, only 50 of the above bridges that are critical and complex structures have been subject to principal inspections.

Subsequently, when routine inspections are delayed there is a risk that issues will become critical before they are noticed. This leads to budgeting difficulties and/or the risk of having to impose restrictions on routes and/or major works being necessary at short notice.

If the current inspection regime continues then it would be prudent to budget for a sizeable contingency sum in the Capital Programme.

## Footbridges and Public Rights of Way (PROW) Structures

11 There are 90 footbridges listed in the highway structures asset inventory. Maintenance of these structures is met from the Bridge Maintenance Budget (£195k) with costs for inspection met from the bridges revenue allocation of £200k. There are estimated to be a further 400 PROW bridges, managed by the Countryside, Leisure and Estates sections. The Bridges Section provides professional advice when requested to the relevant sections. Cycle track structures such as Bont Fawr Aqueduct in Pontrhydyfen carry a 'leisure' facility, and are not judged as strategic assets in the performance of the overall highway network. However, Bont Fawr and New Bridge Road Bridge are Grade II Listed Structures, and require extensive inspection and maintenance. Responsibility for these structures is outside the scope of the highway bridges' budget and works identified are separately funded out of the respective Revenue Budgets.

## New Structures - Harbour Way and Baglan Energy Park

- 12 Harbour Way has added 4 no. highway bridges and Baglan Energy Park Link a further 1 no. However, the Cefn Gwrgan and Baglan bridges are exceptionally large and the overall deck area of highway bridges has increased by around 10%.
- 13 Harbour Way also has 4 no. culverts. These are significantly larger than average and have added approximately 10% to the total 'deck area' of culvert to be maintained. There are also a number of large retaining walls on Harbour Way totalling about 650m in length, these are exceptionally high, averaging around 7m. So whilst the percentage increase in length of walls is small (650m on nearly 104,000m is only 0.6%) in terms of wall area they probably represent an addition of around 2% to the asset portfolio.
- 14 It should be noted that these are new revenue pressures for the service.

## Maintenance Backlog

15 The current backlog is estimated to be circa £1.7m of work. Current levels of expenditure (works only costs) is £195k per financial year. The replacement cost for all the bridges and retaining walls in the county is estimated to be between £350 and £450m, so current maintenance expenditure is only 0.05% of the asset value. At this level it is obvious that the backlog will continue to grow.

## Bridge Strengthening Programme

- 16 Whilst the major issues arising from the Bridge Assessment programme have been dealt with, there are still 24 no. bridges remaining on the list (after this year's work is completed).
- 17 Whilst the majority of these involve relatively minor works to elements of the bridges there are some that require major works. These are detailed below:-

Cymmer Viaduct – estimated cost£2m (alternative access route)Cymmer Railway Bridges£350kThe Green, Neath£100kBridge Street, Neath £40k or £750k if lifting bridge required.

#### Landslips/Carriageway Edge Failures

- 18 There are approximately 148 landslip areas within the Neath Port Talbot county boundary. The majority of these landslips are away from areas of habitation so do not present a risk to life or property.
- 19 The Engineering Section are currently dealing with 17 long standing sites that are impacting on the highway network and which represent potential liabilities if not dealt with in the near future. The current budget for monitoring these sites is £20k. An external specialist consultant has been commissioned to undertake further monitoring of the Panteg landslip. The findings of this report will be the subject of a separate report to Board.

## **Financial Impact**

- 20 The current revenue (backlog programme) of £195k is inadequate to maintain the asset portfolio. Continued under investment will result in emergency works, bridge weight restrictions or closures.
- 21 The budget associated with the outstanding bridge assessment and strengthening programme needs to be at a minimum maintained at the current level and ideally increased to complete the programme.
- 22 Major works identified from the principal inspections are unfunded and will become future capital programme pressures.

23 The monitoring or repair of landslip and carriageway edge failure is also a high risk area and an increasing revenue and capital pressure.

## **Equality Impact Assessment**

A Screening Assessment has been undertaken to assist the Council in discharging its Public Sector Equality Duty under the Equality Act 2010. After completing the assessment it has been determined that this proposal does not require an Equalities Impact Assessment.

## Workforce Impact

25 N/A

## Legal Impact

26 The inspection of highway structures and assets are a statutory duty of the Council, as Highway Authority.

#### **Risk Management**

27 A risk management plan is in place. If no additional funding is identified, then weight limits and/or road closure will need to be implemented.

## Consultation

28 There is no requirement for external consultation on this matter.

## Recommendation(s)

- 29 It is recommended that:-
- 30 Members note the progress to date on the County's bridge assessment and strengthening programme carried out in accordance with the Code of Practice (Appendix A).
- 31 Members approve the forward assessment programme as set out in the circulated report (Appendix B).

32 Members note the increasing pressures for revenue and capital resources to maintain and monitor highway and PROW structures, and associated risks set out in the report.

## Reason for Proposed Decision(s)

33 To maintain the integrity of the structural assets on the Council's highway network.

## Implementation of Decision

34 The decision is proposed for implementation after the three day call-in period.

## Appendices

- 35 Appendix A: List of bridges strengthened in the last 10 years
- 36 Appendix B: List of bridges requiring assessment
- 37 Appendix C: List of Landslips/Carriageway Edge Failures

## List of Background Papers

38 Highway Asset Management Plan

## Appendix C

## List of Landslips/Carriageway Edge Failures

1.	Cwmavon Road, Port Talbot			
	Landslips affecting the B4286 causing uneven road surface. Some evidence that this is a circular slip affecting 200m of road. No significant evidence of landslip affecting retaining wall between road and disused rail land. Monitoring pins being levelled four times/year. <b>£1K per year + resurfacing in 5 years</b>			
2.	Pant-du, Cwmafan			
	Steep slope opposite entrance to new housing estate on B4286. No deep seated movement. Surface movement observed during or after heavy rainfall or high winds. Water flow off land above – investigated, but no obvious solution. Extensive tree reduction works undertaken a few years ago. Frequent claims from car owners from colliding with boulders. No room for catch fencing. Claims have reduced following tree reduction works. <b>£10K</b>			
3.	Pwll y Glaw, Cwmafan			
	Depression affecting A4107 Afan Valley Road. No obvious cause. <b>£20K</b>			
4.	Heol y Glyn, Glyncorrwg			
	Landslips onto road accompanied by large quantities of water, caused build-up of trapped water in moss and peat high on hillside. Three occurrences in last 10 or so years. Each time the road has been closed and Police refuse to open until hillside has been inspected by engineer. However, once the water has been released, the danger is passed. Inspection on forestry land on hillside did not reveal any immediate solution. <b>£1K per year</b>			
5.	Pen y Star, Efail Fach			
	Road closed unofficially due to total collapse of road side. No prospect of rebuilding bank and restoring support. Remedial works			

	could involve moving road laterally into upside including retaining wall and/or mass earthworks on private land. Alternative route now used for many years without incident. Complaints initially but it would appear that all residents apart from Sardis Chapel accept the situation. Route does not warrant the cost of reconstruction and the bends below and under railway bridge pose a significant risk to road users. <b>£500K</b>
6.	Ormes Road, Skewen
	This road and New Road are <u>not</u> adopted highways. It was resolved by Committee many years ago that those roads should not be adopted.
	The area is not recognised as a landslip area, however, there are 12 plots and houses which remain empty. Also, area between Ormes Road and Newell Road was drilled by a potential developer but ground conditions were not suitable. Evidence of long term instability.
	Complaints and claims regarding drainage and collapsed retaining walls are being dealt with by Drainage Section and Insurance Section. <b>£1k per year</b>
7.	Forest Goch, Bryncoch A474
	Road in danger of losing support due to meandering River Clydach. Water main has been diverted. NRW denied responsibility. Works needs to reinstate bank protection and infill to support road. <b>£30K</b>
8.	Glan Rhyd, Ynysmeudwy
	River Tawe meandering closer to A4067 Swansea Valley road. Works carried out many years ago, but ideally additional works required. NRW would not object to us extending blockstone and moving shingle. <b>£30K</b>
9.	Ynysmeudwy B4603
	Road edge and footway collapsed and fenced off. Road has been drilled and investigated leading us to conclude that movement should not extend out into carriageway. <b>£55K</b>
10.	Graig Road, Garnant

Footway depression occurring over many years and requiring regular reinstatement. Extensive investigation by the Coal Authority has proved that it is not caused by mining activity. Evidence of old leat crossing road at this point, possibly serving steam engine sheds in valley below.
Reinstatement would possibly entail reconstruction from river bed level below, however, sewer main in embankment and fibre optic Openreach cables in footway. Carry on reinstating footway. <b>£1K per year</b>
Graig Road, Godre'r Graig
Loss of footway and support to carriageway. BT pole and manhole/cables in footway. <b>£20K</b>
Panteg, Godre'r Graig Landslip
Monitoring of pins on roads and on trees carried out periodically.
Further report and re-assessment by Earth Science Partnership due when available.
Movement over winter has continued as expected. Objective is to monitor and if possible warn of imminent movement. <b>£250K over 5 years.</b>

# Agenda Item 7

## NEATH PORT TALBOT COUNTY BOROUGH COUNCIL

Environment and Highways Cabinet Board 10 December 2015

Report of the Head of Engineering & Transport D. W. Griffiths

#### Matter for Decision

Ward Affected: All

#### List of approved Contractors

#### Purpose of Report

1. To seek Members' approval to amend the Approved List of Contractors.

#### Background

- 2. Members will be aware that on previous occasions reports concerning the compilation of the Approved List of Contractors have been presented to Cabinet Board. Members are updated on a regular basis on outstanding issues relating to the lists.
- 3. The full list of categories is set out in Appendix A for your information.
- 4. The following firms have applied to be included in the list:-

	FIRM	CATEGORY
1	MSH Building Ltd (Cwmbran)	12, 15, 16, 18, 20, 30, 35
2	Sealability (Hirwaun)	25, 27, 35, 36, 51, 79, 88, 89, 99, 100 & 111
3	Lanes Group (Pontyclun)	94 & 95

5. Screening Assessment has been undertaken to assist the Council in discharging its Public Sector Equality Duty under the Equality Act 2010. After completing the assessment it has been determined that this function does not require an Equality Impact Assessment.

## **Financial Implications**

6. None.

## **Consultation Outcome**

7. The Approved List of Contractors is promoted on NPT web pages through local events.

## Sustainability Appraisal

8. The process gives local companies an opportunity to provide goods and services to the Council.

## Recommendation

9. It is recommended that:-

Contractor 1-3 to be included on the Approved List for the relevant categories.

## **Reasons for Proposed Decision**

- 10. To keep the Approved List up-to-date and as far as possible ensure a competitive procurement process.
- 11. These recommendations to be adopted for the purpose of supplying a List of Contractors for invitation to tender within the relevant category.

## List of Background Papers

12. Equalities Impact Assessment Screening Form

## Appendices

13. Appendix A – Approved List of Categories

## **Officer Contact**

14. Brian Biscoe, Programme & Commissioning Manager, Tel. No: 01639 686915, email: <u>b.biscoe@npt.gov.uk</u>

## **General Services**

- 1. Signs
- 2. Plant Hire
- 3. Security
- 4. Clinical Waste
- 5. Pest Control
- 6. Re-Cycling
- 7. Waste Disposal (eg. Car, Computers, Steel)
- 8. Crowd Control
- 9. Traffic Management
- 10. Portable Buildings
- 11. Scaffolding

## **Building Construction / Maintenance**

- 12. Building Construction £50,000 £200,000
- 13. Building Construction £200,000 £1m
- 14. Building Construction Over £1m
- 15. Minor Building Works below £50,000
- 16. Works of Adaptation below £5,000
- 17. Re-Roofing
  - a) Felt & Asphalt below £10,000 / above £10,000
  - b) Tiles & Slate below £10,000 / above £10,000
  - c) GRP
  - d) High Performance Coverings
  - e) Sheeting & Cladding
- 18. Supply & Installation of Floor Finishes
  - a) Flexible Sheet, Tiles, Carpets
  - b) Jointless
  - c) Rigid Tiles, Slabs, Mosaics
  - d) Wood
- 19. Plastering
- 20. Painting & Decorating
- Supply & Installation of Windows / Doors (Windows to BS 7412, Doors to PAS 23/1, PAS 24/1 to BS 7950 Kitemark Scheme)
  - a) PVCU (using Aluplast System)
  - b) Timber
  - c) Aluminium
  - d) Steel
  - e) Roller Shutter
  - f) Security Doors

- g) Automatic Doors
- 22. Suspended Ceilings
- 23. Welding / Fabrication below £5,000
- 24. Welding / Fabrication above £5,000
- 25. Stonework Repair / Restoration / Cleaning
- 26. Glazing & Safety Filming
- 27. Wall Tie Replacement
- 28. External Wall Insulation
- 29. Damp Proofing / Dry Rot / Woodworm Treatment
- 30. Cavity Wall and / or Loft Insulation
- 31. Asbestos Handling & Removal, Asbestos Surveys & Asbestos Consultancy Services
- 32. Window Blinds
- 33. Shop Fitters Specialist Joinery
- 34. Refurbishment of Laboratories
- 35. Clearance of Void properties
- 36. Works to Listed Buildings

## Mechanical & Electrical Engineering

- 37. Domestic (including Housing) Plumbing & Central Heating below £50,000
- 38. Domestic (including Housing) Plumbing & Central Heating above £50,000
- 39. Commercial Heating & Ventilating below £100,000
- 40. Commercial Heating & Ventilating above £100,000
- 41. Domestic (including Housing) Electrical Installation below £50,000
- 42. Domestic (including Housing) Electrical Installation above £50,000
- 43. Commercial Electrical Installations below £100,000
- 44. Commercial Electrical Installations above £100,000
- 45. Gas Boiler Maintenance
- 46. Maintenance of Building Management Systems for Heating & Ventilation

## Mechanical & Electrical Specialist Services

- 47.CCTV
- 48. Intruder Alarms
- 49. Fire Alarms
- 50. Warden Call System
- 51. Lifts
- 52. Swimming Pool Plant Equipment
- 53. Water Systems Cleaning & Chlorination
- 54. Ductwork System Cleaning & Sterilisation
- 55. Domestic & Commercial Kitchen Equipment Maintenance

- 56. Supply & Installation of Specialist Kitchen Equipment / Fittings
- 57. Installation, Testing & Maintenance of Local Exhaust Ventilation (LEV)
- 58. Water Systems Risk Assessment
- 59. Supply & Installation of Pipework & Ductwork Installation
- 60. Supply, Installation and / or Servicing of Automatic Door Systems
- 61. PA Systems / Sound Systems
- 62. Stage Lighting
- 63. Service / Repair of Kilns
- 64. Supply, Installation & Servicing of Leisure Services Equipment
- 65. Specialist Steelwork (stainless Steel & Fabricated Works)
- 66. Lightening Conductors
- 67. Fire Fighting Equipment including Hose Reels
- 68. Smoke / Fire Detectors
- 69. Stage Equipment including Curtains, Gantry, Special Effects etc.
- 70. Computer / Telephone Cabling

## **Civil Engineering**

- 71. Civil Engineering £0 £25,000
- 72. Civil Engineering £25,000 £250,000
- 73. Civil Engineering £250,000 £1m
- 74. Civil Engineering over £1m
- 75. Land Reclamation
- 76. Sewers & Drainage
- 77. Hard & Soft Landscaping
- 78. Ground Investigation
- 79. Demolition
- 80. Surfacing, Carriageway & Footways
- 81. Surface Dressing
- 82. Road Markings & Reflective Road Studs
- 83. Carriageway Slurry Surfacing & Footways
- 84. Fencing
- 85. Gabion & Blockstone
- 86. Steel Fabrication below £25,000
- 87. Steel Fabrication above £25,000
- 88. Bridge Works, New & Maintenance

## **Civil Engineering Specialists**

- 89. Concrete Repairs
- 90. Diving Inspections & Works within Water
- 91. Bridge Deck Expansion Joints
- 92. Bridge Deck Water Proofing
- 93. Soil Nailing

- 94. Sewer Relining
- 95. Sewer Surveys
- 96. Safety Fencing
- 97. Bridge Parapets (Manufacture & Installation)
- 98. Access Plant for Inspection
- 99. Bridge Parapet Painting
- 100. Painting of Structural Steelwork
- 101. Aboriculturalist
- 102. Weedspraying
- 103. Weather Forecasting
- 104. Playground Equipment
- 105. Specialist Cleaning
- 106. Synthetic Pitches and Sports Facilities
- 107. Bus / Cycle Shelters
- 108. Traffic Signals
- 109. Street Lighting
- 110. Street Furniture
- 111.Specialist Contractor not listed above please specify type of work

## Agenda Item 8

## NEATH PORT TALBOT COUNTY BOROUGH COUNCIL

## Environment and Highways Cabinet Board 10 December 2015

#### Report of the Head of Engineering & Transport D. W. Griffiths

#### Matter for Decision

#### Wards Affected: All

#### Installation and accreditation of MOT Class 4, 5 & 7 Testing Facility at Tregelles Court Vehicle Maintenance Workshops

#### Purpose of Report

1 To seek Members' approval to apply to the Driver and Vehicle Standards Agency (DVSA) to install a Vehicle Test Station and become a designated Council/authorised Examiner at the vehicle maintenance workshops at Tregelles Court, Neath Abbey, Neath.

#### **Executive Summary**

- 2 Currently this service is outsourced to a number of local MOT Test Stations, where they conduct the annual tests for an agreed fee.
- 3 It is proposed that we set up and conduct an in-house MOT testing facility. This facility will offer added service to the area, where there are limited facilities for some of the additional classes of vehicles we propose to test. We will not only provide savings to the Authority's fleet, but also offer an impartial test for others like the taxi trade, schools, staff and members of the public.
- 4 A new MOT facility will not be expensive to set up as we already have the majority of equipment installed. The additional testing will help secure jobs within Fleet Services and deliver efficiency savings whilst also meeting the financial challenges faced by the Authority through income generation.

## Background

- 5 The vehicle maintenance section currently arranges around 225 annual MOT tests on Class 4, 5 & 7 vehicles. (Appendix 1) These vehicles range from small, medium, heavy vans and also include buses/ mini-buses operated by the Authority and Schools.
- 6 Our current arrangement means that we sub-contract this work to a number of local MOT test stations at cost of approximately £12k to the Authority. On top of the cost of paying for the MOTs, the current process is very labour intensive, as we have to arrange delivery and collection of these vehicles with limited staff numbers, which has a large impact on workshop productivity.
- 7 As part of the Authority's review into income generation and to reduce costs, initial work between the Fleet Manager and the Project team has been undertaken to look at conducting MOT testing in-house, as well as offering a service to taxi trade, staff and the general public.
- 8 Applying for accreditation is a complex process, where a number of requirements set by the DVSA have to be satisfied in order to become an authorised test centre.

## Current Provision

- 9 Currently this service is outsourced to a number of local MOT test stations where they conduct the annual tests for an agreed fee; this is both expensive and labour intensive for the following reasons:
  - Before taking vehicles for test, the vehicles are already inspected by our own workshop staff to make sure we get limited failure rates, so we are already examining vehicles to MOT standards in-house only for them to have another test by an authorised test station.
  - With staff being reduced within the section to achieve budget savings, we are required by some test centres to deliver vehicles and collect them for testing. This has a direct impact in lost productivity in the workshop and has an effect on service delivery to other service users and front line services.

- Current vehicles being tested in class 4, 5 & 7 amount to approximately 225 vehicles per year, with prices ranging from £30 to £58 per test.
- The workshop at Tregelles Court in Neath Abbey currently has most of the equipment needed to set up as a Test Centre, which will include two test bays to give flexibility for testing.
- 10 We have recently installed a DVSA approved brake tester, emissions tester and already have in place one pit, one 5 ton vehicle lift, one beam tester and other equipment needed.

#### Application Process

- 11 Fleet Services require Council approval to apply to the DVSA to become a designated Council/authorised Examiner and conduct MOT testing. The application will be submitted after we are satisfied we conform to DVSA requirements. These include:
  - Planning Permission
  - Planned drawings for the layout of existing bay areas, parking and access and exit from site
  - Checking that current equipment is on approved list
  - Staff training to required standards
  - Signing off by Accountable Managers
  - Viewing area
  - Computer system updates
  - Health & Safety plus risk assessments for members of the public

#### Changes to Fleet Services

- 12 To ensure Fleet Services conform to the above application, additional equipment and provisions need to be approved. These include:
  - Pit turn plates and lift beam tester
  - Re-coat existing pit area flooring and paint
  - Staff re-alignment and training. As part of the application, designated roles must be submitted which will include; designated Council/authorised Examiner, Station Manager,

nominated testers and quality controller. Possible minor restructure to enable accountability and control may be required.

- IT equipment
- Planning consent
- Training of staff for the above roles (free training with DVSA)
- Paying facility at reception area
- Secure safety deposit box and accountability

See financial section of report for cost information.

- 13 The introduction of a testing facility at Tregelles Court would help secure additional work for Fleet Services and secure vehicle technician jobs, whilst the current fleet is being reduced.
- 14 It will provide a valued service to a number of areas, in particular, the taxi trade, staff and members of the public, by providing an impartial MOT test through a recognised and trusted organisation.
- 15 This will have a positive impact in relation to road safety, provide cost savings and income generation to meet the Authority's financial challenges.
- 16 There is also a lack of class 5 and 7 testing stations in the locality, so we will provide added value to the local area.
- 17 All equipment and services can be easily removed and reinstalled in the event of any Local Government reorganisation or possible site relocation in the future.
- 18 Staff will have additional training delivered free of charge by the DVSA located in Bridgend. This will give a more consistent level of testing standards with the current inspection team and have regular quality controls in line with national standards for both MOT and taxi testing.
- 19 Some local MOT stations will lose business due to the Authority bringing the testing back in-house and possibly losing some business from members of the public vehicles. However, the class 5 and 7 test centre currently used are located out of the County Borough in Swansea.

## Market Research and Benchmarking

- 20 The Local Authority has recently undertaken a benchmarking exercise of all Local Authorities across Wales in relation to Authorities who operate MOT testing facilities, of the 22 Authorities in Wales, 13 responded. From the survey, seven Local Authority fleet workshops offer MOT testing facilities which are utilised both for Authority vehicles, taxi trade, 3<sup>rd</sup> party contracts, members of staff and the general public. Testing prices have been obtained from both external local supplier data and data received from various Local Authorities. Using this data we can then align testing costs for all vehicle classes with varying prices for staff, third parties and the general public. We can also offer MOT tests to taxi proprietors. Currently taxis require the following:
  - Annual MOT test conducted by local garage
  - Two Council tests under Local Provisions Act conducted by Fleet Services at Tregelles Court
- 21 With the introduction of an MOT station at Tregelles Court, we could include one of the two current taxi tests with an MOT test for all Hackney Carriages and private hire vehicles. This will be at a reduced cost to the taxi trade not only in payment costs, but also proprietors having to arrange separate MOT tests, which result in lost labour taking them for two tests as opposed to one.

Garage Name	Class 4	<u>Class 5</u>	<u>Class 7</u>
Abbey Services	£50	£50	N/A
CEM Days	£35	N/A	N/A
Enterprise Tyres	£45	N/A	N/A
Autofix Skewen	£50	N/A	N/A

## Current MOT Station Rates in Neath Abbey Area

- 22 If MOT testing was approved for taxis and members of the public, we would encourage on-line payment of fees in line with the 'Digital by Choice' strategy. There could however, be an option to allow card payments to be made at Tregelles Court at a cost of £1,200 per annum.
- 23 Depending on the success of the initiative, there may be a future requirement to make a slight amendment to the existing staffing

structure to incorporate a nominated MOT Station Manager. Any changes to the existing structure will be reported to Members as appropriate.

## Proposed way forward

- 24 If this proposal is supported, then an application will be submitted to the DVSA for class 4, 5 and 7 test station approval. Before approval is granted, work will commence installing the remaining equipment needed for carrying out testing on both bays, subject to a site inspection by a DVSA vehicle inspector. Any staff training can be arranged and completed, and possible realignment of staff agreed and put in place.
- 25 After full site approval has been granted, testing can commence firstly on Authority vehicles, but also with a view to rolling out to the taxi trade, staff, 3<sup>rd</sup> party companies and the general public. Financial analysis will also be carried out to see if any further income could be generated.

## **Financial Impact**

	<u>One-off</u>	<u>Annual</u>
Set-up costs	-3,625	
Savings – current MOT costs		12,472
Other possible income – taxis (based on 150 of the 300 taxies we inspect)		1,943
Other possible income – contract hire vehicles (based on all contract hire vehicles we have)		614
Other possible income – members of the public (based on 200 MOTs p.a.)		1,898
	-3,625	16,927

## Equality Impact Assessment

26 Screening Assessment has been undertaken to assist the Council in discharging its public sector duty under the Equality Act 2010.

After completing the assessment, it has been determined that this function requires a full Equality Impact Assessment. (Appendix 2)

## Workforce Impact

27 This has a positive impact on staff regarding job security and additional training to develop new skills.

## Legal Impact

28 The MOT Station will comply with all legal aspects set out by the Driver and Vehicle Standards Agency (DVSA).

## **Risk Management**

- 29 As NPT will be carrying out the MOTs on behalf of DVSA, some risks will be passed onto them. NPT will receive regular inspections by DVSA vehicle examiners to ensure we comply with their rules and regulations. DVSA then have the ability to remove us from their list of authorised test stations.
- 30 However, we will need the necessary public liability insurance cover in place in the event of a claim being made directly against the Council. This will be done, however this will not incur any additional cost.

## Consultation

31 There is no requirement under the Constitution for external consultation on this item.

## Recommendation

32 It is recommended that Members approve the above proposal so that an application can be submitted to the DVSA to become a designated Council/authorised Examiner and conduct MOT testing on the above classes of vehicles.

## **Reason for Proposed Decisions**

33 To increase the efficiency of the Authority through reducing unnecessary downtime incurred by staff having to go off-site to present vehicles for testing.

- 34 Financial savings on its own fleet as well as generating income from external sources.
- 35 Offer a professional service to the taxi trade, which will reduce taxi testing costs.
- 36 Provide an impartial class 4, 5 & 7 testing facility to the public and staff, at a competitive rate, whilst adding value to the area.
- 37 Secure jobs within the section by taking on additional work, whilst the current fleet is being reduced.

#### Implementation of Decision

38 The decision is proposed for implementation after the three day call in period.

Appendix 1: Description of vehicle classes

## List of Background Papers

Cost breakdown and benchmarking spreadsheet

## **Officer Contact**

Kevin Lewis, Fleet Manager Tel: 01639 765071 or email: k.lewis@npt.gov.uk

Peter Jackson, Integrated Transport Unit Manager Tel: 01639 686091 or email: <u>p.jackson@npt.gov.uk</u>

## Appendix 1

Test Classification

The test classes are:

Class I — Motor bicycles (with or without side cars) up to 200cc

Class II — All motor bicycles (including Class I) (with or without side cars).

Class III — 3-wheeled vehicles not more than 450 kg unladen weight (excluding motor bicycles with side cars).

Class IV — <u>Cars</u>, including 3-wheeled vehicles more than 450 kg unladen weight, taxis, <u>minibuses</u> and <u>ambulances</u> up to 12 passenger seats, Goods Vehicles not exceeding 3,000 kg Design Gross Weight (DGW), <u>motor caravans</u> and Dual Purpose Vehicles.

Class V — Private passenger vehicles, ambulances, motor caravans and dual purpose vehicles with 13 or more passenger seats

Class VII — Goods vehicles over 3,000 kg up to and including 3,500 kg DGW. If a vehicle is presented with a manufacturer's plate and a 'Ministry plate' the weights to be used are those on the 'Ministry plate'.

PSV test (Class VI) — Public service vehicles used for hire or reward with more than eight passenger seats (test conducted by DVSA/DVA staff their own stations, or at DVSA authorised testing facilities (ATF) or designated premises (DP)).

HGV test — Goods vehicles over 3,500 kg GVW and trailers over 1,020 kg unladen weight or 3,500 kg GVW if fitted with overrun brakes (test conducted by DVSA/DVA staff their own stations, or at a DVSA authorised testing facility (ATF) or designated premises (DP)).

## Agenda Item 9

## NEATH PORT TALBOT COUNTY BOROUGH COUNCIL

### Environment and Highways Cabinet Board

#### 10 December 2015

#### JOINT REPORT OF THE HEAD OF ENGINEERING AND TRANSPORT – D.W. GRIFFITHS AND THE HEAD OF STREETCARE – M. ROBERTS

Matter for Monitoring

Wards Affected: ALL

# Environment and Highways Performance Indicators for Quarter 2 of 2015/16

1 Quarterly Performance Management Data 2015-2016 – Quarter 2 Performance (1st April 2015– 30<sup>th</sup> September 2015)

## **Purpose of the Report**

2 To report quarter 2 performance management data for the period 1<sup>st</sup> April 2015 to 30<sup>th</sup> September 2015 for Environment. This will enable the Environment and Highways Cabinet Board and Scrutiny Members to discharge their functions in relation to performance management.

## **Executive Summary**

3 In line with the Council's six improvement priorities embedded within the Corporate Improvement Plan, Environment scrutinise performance within Waste Management and Transport and Highways. On the whole performance demonstrates improvement in line with what we planned to deliver.

## Background

4 The role of Scrutiny Committees was amended at the Annual Meeting of Council in May 2010 to reflect the changes introduced

by the Local Government (Wales) Measure 2009; Environment will:

- Scrutinise the performance of all services and the extent to which services are continuously improving.
- Ensure performance measures are in place for each service and that the measures reflect what matters to local citizens.
- Promote innovation by challenging the status quo and encourage different ways of thinking and options for service delivery

Failure to produce a compliant report within the timescales can lead to non-compliance with our Constitution. Furthermore failure to have robust performance monitoring arrangements could result in poor performance going undetected.

## **Financial Impact**

5 The performance described in the report is being delivered against a challenging financial background.

## **Equality Impact Assessment**

6 This report is not subject to an Equality Impact Assessment.

## **Workforce Impacts**

7 During 2014/15, the Environment Directorate saw a further downsizing of its workforce (by 114 employees) as it sought to deliver savings of 3.996 million in year.

## Legal Impacts

- 8 This progress report is prepared under:
  - 1. The Local Government (Wales) Measure 2009 and discharges the Council's duties to "make arrangements to secure continuous improvement in the exercise of its functions".
  - 2. The Neath Port Talbot County Borough Council Constitution requires each cabinet committee to monitor quarterly budgets and performance in securing continuous improvement of all the functions within its purview.

## **Risk Management**

9 Failure to produce a compliant report within the timescales can lead to non – compliance with our Constitution. Also failure to have robust performance monitoring arrangements could result in poor performance going undetected.

## Consultation

10 No requirement to consult

## Recommendations

11 Members monitor performance contained within this report.

## **Reasons for Proposed Decision**

12 Matter for monitoring. No decision required.

## Implementation of Decision

13 Matter for monitoring. No decision required.

## Appendices

 Appendix 1 - Quarterly Performance Management Data 2015-2016– Quarter 2 Performance (1<sup>st</sup> April 2015– 30<sup>th</sup> September 2015) – APPENDIX 1

## List of Background Papers

Appendix 1

#### Quarterly Performance Management Data 2015-2016 – Quarter 2 Performance (1st April 2015– 30<sup>th</sup> September 2015)

#### Report Contents:

Section 1: Key points.

Section 2: Quarterly Performance Management Data and performance key

#### Section 3: Compliments & Complaints Data

#### Section 1: Key Points

#### Waste Management

The Council is progressing with the implementation of its waste strategy and achieved the 2015/16 statutory recycling and composting target of 58% during 2014/15. There is some fluctuation in waste quantities and recycling/composting levels however it is anticipated that a figure of 58% will be repeated in 2015/16.

A proportion of the fuel produced at the Materials Recovery and Energy Centre (MREC) has been placed in temporary storage prior to incineration which has resulted in a small decrease in PI WMT/012, which should catch up in the quarter 3 and 4 of this year.

#### Transport and Highways

Both indicators that are reported on a quarterly basis have improved. The improved performance relating to the average number of calendar days taken to repair street lamp failures is due to ongoing infrastructure renewals such as the installation of new lighting columns, new streetlights and the renewal of cabling. The remaining four indicators are reported on an annual basis.

#### Street Scene & Countryside Management

The performance indicator CMT/001 (SID) The percentage of total length of 'Rights of Way' which are easy to use by members of the public is not a statutory indicator and has been discontinued at a national level. As a result it has been removed from the report.

#### Section 2: Quarterly Performance Management Data and Performance Key

#### 2015-2016 – Quarter 2 Performance (1<sup>st</sup> April 2015 – 30<sup>th</sup> September 2015)

#### Note: The following references are included in the table. Explanations for these are as follows:

**(NSI)** National Strategic Indicators (NSIs) - are used to measure the performance of local authorities at a national level and focus on key strategic priorities. Local authorities are under a legal duty to collect & report on these measures.

**(PAM)** Public Accountability Measures - consist of a small set of "outcome focussed" indicators, selected initially from within the existing Performance Measurement Framework. They will reflect those aspects of local authority work which local authorities agree are considered to be important in terms of public accountability. For example, recycling, educational attainment, sustainable development, etc. This information is required and reported nationally, validated, and published annually.

(SID) Service Improvement Data - can be used by local authority services and their regulators as they plan, deliver and improve services.

**All Wales** - The data shown in this column is the figure calculated using the base data supplied by all authorities for 2014/2015 i.e. an overall performance indicator value for Wales.

(L) Local Performance Indicator set by the Council.

## Agenda Item 10

## NEATH PORT TALBOT COUNTY BOROUGH COUNCIL

Environment and Highways Cabinet Board 10 December 2015

> Report of the Head of Streetcare M. Roberts

#### **Matter for Decision**

Wards Affected: All

Missed Bin Policy

#### **Purpose of Report**

1 To seek approval from Members for the adoption of a policy in relation to 'missed' waste collections.

#### Background

- 2 During any one year the Council undertakes in excess of <u>1.66</u> <u>million</u> collections of refuse and <u>3.32 million</u> collections of recycling; a total of almost **5 million** collections in total from circa 64,000 households in the County Borough, this, however, does not include other collections carried out by the Council for the trade refuse service, the hygiene waste service or the bulk collection service.
- 3 Given the number of waste/recycling collections undertaken each year, it is inevitable that on occasion, some collections may not be made, whether due to vehicle breakdown, crew changes, access issues due to roadworks or parked cars, late presentation of waste, or indeed loader error. Whilst the Council has custom and practice arrangements in place to deal with these occurrences they have never been formally adopted as policy and with the increasing move to online reporting etc. it is intended to include these on the Council's website.
- 4 Further to above, a draft 'Missed Collection' Policy is included as Appendix A, which reflects ongoing custom and practice, for consideration by Members.

#### **Financial Impact**

5 If the Council response to 'missed' collections was changed away from what is currently custom and practice then the financial and general resource pressure would result.

#### **Equality Impact Assessment**

6 A Screening Assessment has been undertaken to assist the Council in discharging its Public Sector Equality Duty under the Equality Act 2010. After completing the assessment it has been determined that this proposal does not require an Equalities Impact Assessment.

#### **Workforce Impact**

7 None

#### Legal Impact

8 None

#### **Risk Management**

9 Auditing and monitoring of reported missed collections via telephone/internet or email will continue as present and will be reported as part of the Performance Management Procedures.

#### Consultation

10 See Appendix A – 'Missed Collection Policy

#### Recommendation(s)

11 The Council adopts the 'Missed Collection' Policy as detailed in Appendix A.

### Reason for Proposed Decision(s)

12 To formalise policy in relation to 'missed' waste collection.

#### Implementation of Decision

13 The decision is proposed for implementation after the three day call in period.

#### Appendices

14 Missed Collection Policy – Appendix A

#### **Officer Contact**

- 15 Andrew Lewis, Waste and Neighbourhood Services Manager, Tel: 01639 686021, e-mail: a.lewis@npt.gov.uk
- 16 Mike Roberts, Head of Streetcare. Tel: 01639 686966 or email:m.roberts@npt.gov.uk

## **APPENDIX A**

#### Missed Bin Policy

- **Refuse** If you report a non collection of refuse by phone during office hours or on the internet by midnight of your allocated refuse collection day we will try and to return to collect it by 4.00pm on the next working day. However if we have not returned to collect the refuse by 4.00pm the next working day then all refuse will need to be taken back onto the property and represented on your next refuse collection day which would be in two weeks time. The Council makes 32,000 refuse collections per week and diverting crews to address non collections risks further multiple households being missed.
- **Recycling** If you report a non collection of recycling by phone during office hours or on the internet by midnight of your allocated day for recycling we will try and to return to collect it by 4.00pm on the next working day. However if we have not returned to collect the refuse by 4.00pm the next working day then all recycling will need to be taken back onto the property and represented on your next refuse recycling day which would be the following week. (please also see the note below concerning green waste and plastics collections). The Council makes 64,000 recycling collections per week and diverting crews to address non collections risks further multiple households being missed. Please note that we may send an alternative Council vehicle, other than the normal waste collection vehicle, to collect recycling. Furthermore, these vehicles may also be dealing with missed refuse collections where household have a black bag service. In such cases please be assured that your recycling is separated at our depot and will not be thrown away.
- Refuse or Recycling whole street missed collection If refuse or recycling for a whole street is reported as being missed during office hours or on the internet by midnight on your allocated day of collection we will return and put right the problem by 4.00pm the following day. If on attendance a missed collection is found to have

been misreported and applies only to a single household then the waste will be left.

- Assisted collections If we miss an assisted collection which is reported as being missed during office hours or on the internet by midnight on your allocated day of collection we will return and put right the problem by 4.00pm the following day (It is noted the Council reserves the right to periodically review the need for assisted collections).
- **Hygiene collection** If we miss a hygiene collection which is reported as being missed during office hours or on the internet by midnight on your allocated day of collection we will return and put right the problem by 4.00pm the following day (It is noted the Council reserves the right to periodically review the need for hygiene collections).
- Trade waste collections When our crews attend paying trade customers they phone in to record if bins have not been presented or if access has been prevented etc., e.g. gates locked. If waste was not presented at the time of attendance we will not go back, and the waste will be collected during the next normal collection. Alternatively, if we have missed a trade waste collection which is reported as being missed during office hours or on the internet by midnight on your allocated day of collection we will return and put right the problem. In any case, when we attend trade premises for collection, any side waste in addition to the purchased wheel bin capacity will be charged for at our contract rates.
- Recycling that has been stickered as 'contaminated' Recycling which has been stickered as contaminated will be left for the household to address. Such waste should be taken in, sorted and represented on the next normal recycling collection day. Contamination that cannot be recycled should be put in your wheeled bin or black sacks for the next normal refuse collection.

<u>Notes</u>

When you report a missed collection our system will identify if your property is on a 'black bag' or 'wheeled bin' refuse collection. It will also identify which type of recycling service your property is receiving.

Missed green waste and plastics collections – whilst the Council is slowly extending its improved 'Recycle+' service across the County Borough the frequency of green waste and plastics collections varies dependent on the service that your street receives. If you have to take back in either green waste or plastics following a missed collection then these should be presented on the next normal day for these items.

Our contact centre or internet reporting system may be able to advise you of the reason for a missed collection, for example, a delay due to vehicle breakdown or access issue due to emergency road openings by utility companies. Furthermore, as part of its 'missed bin' policy individual reports of missed collections are not treated as complaints. Regular reports will however be treated as complaints and dealt with in accordance with the Council's complaints to which end you are asked to make it clear when contacting the Council if you are experiencing regular problems about which you wish to complain.

The Council's waste vehicles typically have all round CCTV and notwithstanding any complaint being made, regular missed reports may be investigated. Whilst previous investigations has shown, for example, that crew changes have led to properties being missed, they have also shown that another reason has been people calling the Council after presenting their waste late. Another reason has been that bins have been rammed with waste to the extent that despite repeated attempts to empty waste with the vehicle bin lift, the waste has remained lodged either fully or partially in the bin. Due to the potential impact on other residents that can arise from diverting vehicles, anyone not presenting their waste in due time is respectfully requested not to report a missed collection in an attempt to have their waste collected. In cases where waste is found to be rammed into bins to the extent that collection is not possible then the waste will be left

## Agenda Item 11

## NEATH PORT TALBOT COUNTY BOROUGH COUNCIL

## Environment and Highways Cabinet Board 10 December 2015

## Report of the Head of Streetcare M. Roberts

## Matter for Decision

## Wards Affected: All

#### HIGHWAY ASSET MANAGEMENT PLAN

#### Purpose of Report

1 To update Members with regard to ongoing development of Highway Asset Management planning and seek endorsement of a revised plan.

#### Background

- In Neath Port Talbot as in other areas, residents, visitors and the business community rely on the local highway infrastructure to undertake their everyday activities. In line with guidance and best practice the Council is continuing to improve Highway Asset Management Planning. The Council's current Highway Asset Management Plan was adopted by Members in July 2013. The HAMP identifies the main asset groups of the highways infrastructure, individual asset inventory and condition data, along with any gaps where issues need to be reviewed to bring practices/assets up to required standards.
- 3 The aim of adopting an Asset Management strategy is to allow a planned approach to improve the management of the highway asset in respect of those components that are maintainable at public expense and for which the Council, as Highway Authority, is responsible. The Council's aim is to ensure the asset is

maintained efficiently to both a safe and serviceable condition in support of the objectives established in the Neath Port Talbot Single Integrated Plan, and the asset plan is intended to set out in practical terms the Council's strategy for doing so.

- 4 In Wales, all authorities have agreed to follow a generic HAMP format derived from working group commissions instigated by CSS Wales (formerly County Surveyor's Society).
- 5 This is the third review of the Council's HAMP since its adoption and the document has been further developed in line with nationally agreed criteria.
- 6 The revised document is attached as Appendix A.
- 7 Highway Asset Management Plans are not a means to an end in themselves and funding is required to take them forward in an ever challenging financial climate. Inevitably there has to be a process of prioritising Council expenditure against competing needs with issues directly affecting safety (e.g. surface condition) and potential property damage (e.g. drainage) increasingly coming to the fore.

#### **Financial Impact**

8 No direct financial implications. The Highway Asset Management Plan is a means of helping to identify the implications of given spending levels and ensure that available monies are spent to best effect.

#### Equality Impact Assessment

9 A Screening Assessment has been undertaken to assist the Council in discharging its Public Sector Equality Duty under the Equality Act 2010. After completing the assessment it has been determined that this proposal does not require an Equalities Impact Assessment

#### Workforce Impact

10 None

#### Legal Impact

#### 11 None

#### **Risk Management**

12 An asset management approach to Highway infrastructure provides with a framework for informed decision making. This plan sets out the management arrangements required to ensure the benefits of investment are optimised and that the highway asset is managed to meet the expectations of the highway user, within the context of the Council meeting its statutory duties as the Highway Authority.

#### Consultation

13 There is no requirement under the Constitution for external consultation on this item.

#### Recommendation(s)

14 It is recommended that the revised Highway Asset Management Plan is endorsed.

#### Reason for Proposed Decision(s)

15 To continue the Council's progress with taking forward Highway Asset Management Planning.

#### Implementation of Decision

16 The decision is proposed for implementation after the three day call in period.

#### Appendices

17 Equalities Impact Screening Assessment

#### **Executive Summary**

Neath Port Talbot County Borough Council's Highway Asset Management Plan (HAMP) provides an integrated framework for the delivery of highway maintenance services across the Authority's road network and optimises resources for the management of the highway infrastructure.

The production of the plan has brought together practitioners for the different asset groups within the Council and follows the principles established nationally in Wales through the County Surveyor's Society.

The purpose of the Highway Asset Management Plan is to ensure the delivery of highway services in an intelligence led and customer responsive way. This approach will ultimately deliver greater value for money and help achieve key council goals and objectives.

Asset management requires a reliable knowledge of asset components and involves developing and maintaining comprehensive inventory and condition data. It also requires understanding individual asset group lifecycles and how long components will last. This knowledge provides the basis for predicting the annual level of investment required to deliver an appropriate level of service in the most cost effective manner. An asset management approach to Highway infrastructure provides a framework for informed decision making. This plan sets out the management arrangements required to ensure the benefits of investment are optimised and that the highway asset is managed to meet the expectations of the highway user, within the context of the Council meeting its statutory duties as the Highway Authority.

#### 1 Introduction

#### 1.1 Highway Asset Management Planning

Asset management is a process intended to ensure that public infrastructure is managed cost effectively and that money spent on the asset is put to the best use. To this end, the following definition of asset management contained within the County Surveyors Society Framework for Highway Asset Management has been accepted by Neath Port Talbot County Borough Council:-

"Asset management is a strategic approach that identifies the optimal allocation of resources for the management, operation, preservation and enhancement of the highway infrastructure to meet the needs of current and future users"

"The adoption of asset management has been proven to provide significant financial benefits" as determined by the review of accounting, management and finance mechanisms for Local Authority Transport Infrastructure Assets, final report published in June 2008. This plan sets out how Neath Port Talbot CBC intends to access the potential benefits founded on the principles of:-

• Affordable standards: the plan establishes standards that can be afforded and communicates them such that the public know what service to expect.

- Long term planning: the plan covers a set time period to ensure the right balance of short term fixes, preventative actions, and planned replacement of aged assets.
- Appropriate Budget allocation: the plan identifies data and analysis concerning our assets to inform decisions about how best to allocate finite resources. It also identifies gaps in knowledge and associated actions.
- **Management of risk**: Within the context of long term planning and the setting of standards and budgets, the plan aims to gauge and manage the risk associated with decisions made.

The production of the Plan has brought together practitioners responsible for the different asset groups within the Council and follows the principles established nationally in Wales through the County Surveyors Society.

This plan needs to be read in conjunction with the Council's Highway Maintenance and Winter Maintenance plans.

#### **1.2 Drivers for Change**

In July 2005 the Roads Liaison Group published "Well Maintained Highways" the Code of Practice for Highway Maintenance Management. This Code emphasizes the need to establish a logical management system in order to deliver value for money in highway maintenance. The Code recognises the need for local flexibility implied by the new focus on the needs of users and the community. It encourages Authorities to respond enthusiastically and creatively to the challenges posed by Best Value, The Wales Programme for Improvement and sustainability.

The objectives of the Code of Practice are:

- To encourage the adoption of asset management planning as a means of demonstrating value for money in the delivery of highway maintenance, consistent with the wide principles of integrated transport, sustainability and Best Value
- To encourage the development, adoption and regular review of policies on highway maintenance, consistent with the wider principles of integrated transport, sustainability and best value.
- To encourage a focus on the needs of users and the community, and their active involvement in the development and review of policies, priorities and programmes.
- To encourage harmonisation of highway maintenance practice and standards where this is consistent with users' expectations, whilst retaining reasonable diversity consistent with local choice.
- To encourage the adoption of an efficient and consistent

approach in the collection, processing and recording of highway inventory, condition and status information for the purpose of both local and national needs assessment, management and performance monitoring.

- To encourage the adoption and regular review of a risk management regime in the determination of local technical and operational standards, the rectification of defects arising from safety inspections, and investment priorities.
- To encourage continuing innovation in the procurement of highway maintenance services, whilst complying with high standards of corporate governance.

In line with the Code of Practice, Neath Port Talbot has established a Highway Maintenance Plan which aims to:

- Maintain safe passage for highway users.
- Protect the asset value of the highway.
- Ensure consistent standards of maintenance across the County Borough relative to road usage.
- Ensure expeditious movement of traffic by complying with the Traffic Management Act.

- Establish a "Needs Based" programme for the maintenance of the network.
- Target resources and maximise the benefit from available funds.
- Facilitate technical and financial monitoring in order to establish trends in highway condition and to assess achievement against expenditure.
- Provide a framework for reviewing policies and standards and for developing strategies.
- Implement the principles outlined in the Code of Practice for Maintenance Management; and,
- Ensure that all highway maintenance is undertaken with due regard for environmental considerations.

As well as endorsing the above aims and objectives implementation of the HAMP will support:

- The introduction of Whole of Government Accounts (WGA) and specifically the CIPFA Transport Asset Code.
- The desire of the Welsh Government to see authorities use asset management as a framework for the maintenance and

#### 7 Page 105

development of highways, and to maximise the cost benefits of investment.

- The pressing need to manage ever increasing budget pressures resulting from the national financial position.
- The introduction of the Prudential Code.
- Arresting the ongoing deterioration in some Highway Assets.
- The targeting of increasingly scarce resources to best effect.
- A positive response to increasing public expectation.
- Links to Communities and promotion of economic wellbeing.
- Corporate drives towards the regeneration of coastal and valley communities.
- Continuing requirements to improve safety and reduce risks to highway users.
- The implementation of defendable strategies in the context of the Association of Chief Police Officers Road Death Investigation Manual.

- Compliance with Department for Transport (DfT) booklet "Maintaining a vital Asset" and,
- Compliance with Code of Practice for Highway Maintenance Management

## 1.3 Progress to Date

This is the fourth update of the Neath Port Talbot CBC Highway Asset Management Plan first produced in 2006. Some of the significant actions taken in the intervening periods include:-

- Development of an in-house condition survey for the unclassified carriageway network and footpaths which is used to inform works programmes.
- Identification of inventory and condition data for safety barriers from which a maintenance programme was developed and actioned.
- The setting up of an inventory database and replacement system for highway signage.
- A review of the council's street lighting following life cycle analysis culminating in a £21 million investment programme to replace aged stock financed through prudential borrowing as part of the Council's Forward Financial Plan.

- A drainage review which has created a comprehensive database of the culverts, gullies and ditches from which improved maintenance schedules have been produced improving cyclical maintenance.
- An updated programme of works to strengthen substandard bridge decks, parapets and other structures.
- The completion of the strategic Port Talbot Peripheral Distributor Road (now named Harbour Way) providing an alternative diversion route off the M4 and opening up the former docks area for regeneration.

## **1.4 Council Expectations from the HAMP**

The Council expects, through the continued refinement of The Highway Asset Management Plan, to continue development of a more planned and holistic approach to maintaining and improving highway assets for users, in line with its Statutory Duties, that maximises return on investment.

## 1.5 Corporate Asset Management within Neath Port Talbot CBC

Neath Port Talbot County Borough Council is committed to continuous improvement. The Corporate approach to Asset Management, particularly in the management and use of the Council's property and highway infrastructure assets, forms part of their commitment in support of the objectives of the Single Integrated Plan (SIP), NPTCBC being a Local Service Board Partner

The Corporate strategy helps to:

- Promote a corporate approach to the management of assets in pursuit of corporate aims and objectives.
- Secure continuous service improvement and build an understanding of the importance of assets in supporting service delivery.
- Manage property and infrastructure holdings and develop information covering their sufficiency, suitability and cost.
- Manage risk across the Council's range of assets.
- Ensure that capital projects are delivered on time and within budget.

#### **1.6 Goals and Objectives of Highway Asset Planning**

The main objectives of this plan are:-

- To identify the extent, condition and value of the Council's highway infrastructure.
- To understand asset and maintenance treatment lifecycles
- To enable the production of informed Works Programmes

#### 11 Page 109

In mapping the way forward, gaps in knowledge and good practice have also been identified along with appropriate improvement actions. Alongside the clinical approach of analysing asset condition and lifecycle data, the input of elected Ward Members is also recognised, with particular regard to local streets in the production of programmes and actions.

It is also noted that environmental (particularly coal tar contaminated surfaces) and economic factors are driving a critical reappraisal of traditional maintenance treatments. Furthermore, the requirement to "do more with less" whilst ensuring solutions are "fit for purpose" has signalled the need to introduce low cost treatments leaving in place as much as possible of the existing surface material, which is in itself a finite resource. To this end Neath Port Talbot CBC has trialled surface dressing schemes using the latest materials and techniques and is currently assessing preventative treatments along with recycling techniques for the purpose of lowering carbon footprint and increasing sustainability in its maintenance practice. Micro-asphalt, and jet injection patching are new systems that are frequently in use today. Thermal patching is another system that is presently being trialled and shows great potential for future strategies

The DfT booklet 'Maintaining a Vital Asset' sets out the UK Government's expectations of councils in maintaining their networks. If the Council is to meet these expectations, it can only do so through the better use of its resources and the adoption of asset management

planning. In addressing the expectations of Government in the areas of footways and unclassified roads, the Council has demonstrated a cost effective and innovative approach through the efficient use of internal resources, inventory and condition data providing for informed decision-making.

Considerable progress has been made in the implementation of asset management principles since the HAMP was first published. The identification of risks, performance gaps and the subsequent improvement actions are now enabling an improving level of asset management aimed, in the first instance, at arresting further deterioration of the Council's highway asset.

### 1.7 Time period and updating of this HAMP

This Highway Asset Management Plan covers the period 2015-2018 albeit the actions are based on longer term lifecycle plans. During this period the HAMP will be updated to capture any changes as a result of the ongoing improvements, reviews, budget changes and risk assessments.

#### **1.8** Application of the HAMP

The HAMP aims to bring together all the Authority's goals, objectives and policies utilising both existing and new practices, and sets out how the principles of asset management are being applied to ensure the highway service meets the requirements of the Council and highway users.

Effective planning will ensure that the network functions efficiently by highlighting the maintenance needs of the various highway components whilst taking into account the effects of damage caused by increased traffic flows, heavier and larger vehicles, climate change, expanded operations by utilities, and increasingly constrained budgets.

The plan is expected to provide an effective management tool for the running of the highway network with inventory and condition surveys of the different main highway assets enabling cost and risk analyses in lifecycle analysis to inform summary actions, service standards and works programmes.

Continued assessment and monitoring over time will provide the basis for measuring performance standards.

#### **1.9 Strategic Document Framework**

The strategic document framework below details the relationship between the various strategic documents within the Council, and how the Highway Asset Management Plan fits in.

**Diagram 1.9.1 Strategic Document Framework** 

# 2 Asset Description

# 2.1 The Highway Asset

Neath Port Talbot CBC has detailed geographically referenced data sets for the eight main asset groups which are shown in Table 2.1.1 below:-

Table 2.1.1 Neath Port Talbot CBC – Main Highway Assets								
Asset Description	Elements							
Carriageways	Including lay-bys, bus lanes etc.							
Footways	Including footways adjacent to carriageways							
Structures	Including Bridges, culverts and retaining walls etc.							
Lighting	Including Lighting columns, illuminated signs/bollards etc.							
Traffic Signals	Including signalised junctions and pelican crossings							
Signage	Including warning signs and regulatory signs etc.							
Drainage	Including road drainage manholes, gullies and culverts (including inlets, intakes, outlets and outfalls) etc.							
Road Restraint Systems (Crash Barriers)								

Since the original HAMP was produced in 2006 the Asset inventory has developed to such an extent that we now also have detailed information on the following additional assets groups shown in Table 2.1.2 below:-

Table 2.1.2 Neath Port Talbot CBC – Additional Highway Assets						
Asset Description	Elements					
Cycle Routes	All cycle routes					
Street Furniture	Including street name plates, bus					
	shelters, bins, grit bins, pedestrian					
	barriers, cattlegrids, highway trees,					
	seating etc.					
Road Markings	Road markings (limited)					
Weather Stations	All weather stations					
Traffic Calming measures	Including plateaus, speed cushions etc.					
Bus Shelters						
Dog Bins						
Post and Rail Fencing						
Invasive Species	Knotweed, treated zones					
Car Parks						
Residents Parking Bays						
Salt Bins						
Speed Cameras & Speed Advisory						
Signs						
Telephone Kiosks						
Tactile Paving						
Pedestrian Crossings						

An inventory overview of the main Highway Asset Groups is shown in Table 2.1.3:-

Table 2.1.3 Neath Port Talbot CBC – Main Highway Asset Inventory						
Asset Description	Amount	Unit				
Carriageway	848.9	Kilometres				
Footways	940.18	Kilometres				
Structures:						
Bridges	356	Number				
Culverts > 1 metre	80	Number				
Diameter	649	Number				
Retaining walls						
(in NPT ownership)	1,175	Number				
Retaining walls						
(ownership unknown)						
Street Lighting	17,279	Number				
Traffic Signals (light	372	Number				
heads on junction control	(sets of traffic signals 67)					
and pedestrian						
crossings)						
Signage:						
Illuminated (inc. bollards)	3,695	Number				
Non illuminated	10,443	Number				
Drainage:						
Road culverts	1,200	Number				
Gullies	30,462	Number				
Safety Barriers /Vehicle	39.87	Kilometres				
Safety Fences	368	Sections				
Post and Rail pedestrian	31.3	Kilometres				
barrier	498	Sections				

# 2.2 Assets Not Covered by this Plan

Assets not covered by this plan include the following:-

- Motorways and Trunk Roads.
- Footpaths and car parks identified by Estates as being in Authority ownership but not maintained by the Highway Authority.
- Garage compounds owned by others.
- Public Rights of Way.
- Un-adopted / private roads.
- Lighting to car parks and parks not maintained by the Highway Authority.
- All other assets upon the highway that fall under the responsibility of other organisations such as Utility Companies.

#### 2.3 Asset Growth

The carriageway asset in Neath Port Talbot has, over the two years since the last HAMP, grown by 31.2 kilometres, representing a 3.8% network growth.

This increase has been due mainly to:-

- New residential housing developments in the local area resulting in the adoption of new roads by the Authority.
- The completion of the new Peripheral Distributor Road (PDR) around Port Talbot.

#### 19 Page 117

This growth has resulted in an increase in other assets such as footpaths, drainage systems, street lighting and carriageway markings highlighting the need to periodically update the relevant asset information.

It is expected that, despite the economic downturn, this growth pattern will continue over the length of the plan due to a number of housing developments, including the Llandarcy Village development and development around the Port Talbot Peripheral Distributor Road (Harbour Way).

In addition, increased use of high specification materials, such as anti-skid and coloured surfacing, as part of accident reduction measures, as well as block paviors and decorative stone flags in town centres, as part of regeneration schemes, increase the overall cost of asset maintenance.

#### **3** Community Requirements

#### 3.1 Customer Consultation

The main sources of identifying local needs is through correspondence and via the Council's call centre and Customer Response Management system which handles queries and complaints from the public. Requests for service from the general public are carefully monitored and the detailed reports along with accident claims provide a valuable source of information which can be fed into the budget and works programming processes.

The Authority also has an established process of dialogue with elected Ward Members prior to finalising Planned Works Programmes. This process affords Members an opportunity to table concerns/requests in response to the needs of their ward constituents which can be considered in conjunction with the works identified from the condition surveys and other means.

As an indication of public demand for highways related activities, between 1 April 2014 and 31 May 2015, the call centre received 8,550 calls relating to Neighbourhood and drainage issues as categorised in Table 3.1.1 below and Table 3.1.2 overleaf:-

# Table 3.1.1 Neighbourhood Demand (calls received)

Category	Total Calls
Graffiti	27
Fly Tipping	1,897
Street Cleansing	2,992
Grounds Maintenance	983
Dogs	561
Gritting / Snow	56
Pot Holes / Highways	1155
Total	8,550

#### Table 3.1.2 Drainage - type and frequency of demand

22 Page 120 It can be seen from the above (taken from calls received via the Customer Services contact centre) that when the survey was carried out blocked gullies was, by some margin, the biggest drainage maintenance demand.

# Diagram 3.1.3 Analysis by letters/e mails from the public in relation to drainage

A Customer Satisfaction Survey for Drainage indicated that what mattered to the public was:-

- No Smells
- Gullies do not overflow
- Drains are maintained regularly
- Regular cleaning of fallen leaves
- Cleaning of gullies
- Quick response times to emergencies
- No water on road
- No noisy inspection covers
- Culverts do not flood

In the same period the results of a Customer Satisfaction Survey for Neighbourhood Services is shown below where members of the public were asked to rate the Council out of 10.

# Table 3.1.4 Customer Satisfaction Survey – Neighbourhood Services

24 Page 122 The public were asked "*if not a 10, how could we achieve a 10*?" and typical replies / comments are listed below:-

- Problems with grass verge not being cut and parking.
- Potholes in the road and pavement. Litter picker is good.
- My street is ok.
- Parking and potholes are bad.
- I live on a hill and the council are reluctant to come up some times.
- Potholes are a big problem it damages your car.
- Litter and potholes.
- Clean the streets more and potholes.
- Needs more sweeping and get shot of the weeds.
- The street around my area is ok.
- Streets are good.
- Grass and weeds and potholes are bad.
- Our road is in need of repair, potholes all along the roads.
- Potholes outside my house, everything else is good.
- Potholes on hill and litter needs to be cleaned more in out streets.
- Won't get 10 out of 10, only in a perfect world.
- Re surfaces and better roads.
- Lower council taxes, more lighting and more facilities on the beach.
- Potholes and fly tipping.
- Re vamp streets and roads around shopping centres.

#### <sup>25</sup> Page 123

- Potholes and re surfacing.
- Potholes, weeds and dog fouling.
- Cleaner streets.
- Cutting grass and parked cars.
- Potholes.
- Better lighting and potholes.

# 3.2 Results of Consultation and Use of Results

Information in the previous section has been used to help identify specific problem areas relating to the highway / drainage infrastructure and assist in identifying:-

- Potential projects for inclusion in future works programmes
- Maintenance hot spots

However, whilst feedback is useful it is not intended that the Highways Asset Management Plan will be particularly driven by public consultation alone as many of the issues addressed by the HAMP are technical in nature and need to be considered in the context of longer term analysis and projections.

It is anticipated that in future years there will be continued stakeholders, consultation with specific such statutory as undertakers, to obtain the benefit of their input, to coordinate shared understanding investment. and ensure а of asset management as it affects their particular areas of interest. This will help ensure that stakeholder input is appropriately considered in the establishment of policy and practice adopted by the Authority. Input from stakeholders is also a valuable source of information concerning some aspects of the network and associated maintenance strategies. Their data will, along with technical surveys and other related information, contribute to ensuring appropriate asset management decisions are made.

#### 4 Future Demands

#### 4.1 Introduction

This section outlines the demands that we anticipate will be placed on the highway asset over the duration of this plan. These demands together with the associated risks have been considered when formulating the plan.

#### 4.2 Traffic Growth and Composition

Past increases in car ownership and the general reliance on the private car has put pressure on roads and existing junctions through increased demand for road space. A number of key roads and junctions are at capacity and congested which is constraining growth in some areas and affecting the daily life of residents. The statistics below, from the Department for Transport, indicate the changes in volume of traffic over the past 10 years or so.

#### Table 4.2.1 Volume of Traffic 2000-2013

	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
Billion Vehicle Km. in Neath Port Talbot	1.17	1.20	1.25	1.27	1.30	1.38	1.34	1.32	1.27	1.30	1.29	1.30

	Motorway	Notorway A Trunk - A Trunk - A County A County -				
		Urban	Rural	-Urban	Rural	Roads
2007 - billion vehicle kilometres	0.55	0.02	0.20	0.11	0.24	1.12
2008 - billion vehicle kilometres	0.53	0.02	0.20	0.11	0.23	1.09
2009 - billion vehicle kilometres	0.51	0.02	0.20	0.11	0.23	1.07
2010 - billion vehicle kilometres	0.48	0.02	0.19	0.11	0.22	1.03
2011 - billion vehicle kilometres	0.51	0.02	0.19	0.11	0.23	1.06
2013 - billion vehicle kilometres	0.52	0.02	0.20	0.11	0.22	1.06

#### Table 4.2.3 Volume of Traffic by Class of Road 2007-2013

The volume of traffic by "class of road" in Neath Port Talbot (table 4.2.3) reflects an overall reduction in traffic from 2007 to 2013 (from 1.12 billion kilometres in 2007, to 1.03 billion in 2010). The reason for the reduction in traffic is unknown and could be a result of a number of factors, such as cost of fuel, the financial down-turn, or residents choosing more active forms of travel.

Whilst the overall level of traffic in NPT has been static over the last few years demand for road space in some localized areas is high and/or increasing. As a result, due to the level of traffic, local topography and the existing road system within urban areas, a number of congestion hot spots exist across the County Borough.

# Within Neath:

- <u>M4 Junction 43 (Llandarcy</u>): The capacity at this strategic junction between the M4 and the A465 (T) is a concern. Major improvements are ongoing to serve the Coed Darcy development, but future proposals to dual the entire length of the A465 will need to consider any need for further capacity improvements.
- <u>Pen-y-Wern Junction (Bryncoch, Neath)</u>: Experiences congestion at peak times. Any further development would have an impact on the junction and could require road improvements between the junction and the Neath River viaduct – this would be expensive and could undermine the viability of any proposed development.
- <u>Cwrt Herbert / Roman Way</u>: Experiences congestion at peak times, one factor being the proximity to Dwr y Felin School. Land adjacent to Roman Way offers an opportunity to provide bulky goods shopping or housing in a central sustainable location, but such development could also increase traffic generation.

- <u>Neath Abbey / Tesco</u>: Experiences congestion at peak times.
- <u>Neath Town Centre (Stockham's Corner / Cimla Hill / B&Q /</u> <u>Gnoll / Victoria Gardens)</u>: faces congestion, air pollution (Victoria Gardens) and in worst cases 'gridlock' at peak times. While development and regeneration proposals aim to revitalise the town centre, congestion could constrain demand.

#### Within Port Talbot:

- <u>M4 Junctions 41 / 40 (Port Talbot</u>): These junctions currently provide access points to Port Talbot, Cwmafan and the Afan Valley. With the completion of the PDR the Welsh Government has experimented with slip road closures, or partial closures (at Junctions 40 and 41), to discourage the use of the M4 for local traffic. The results of the experiments are being considered and whilst junction restrictions may ease congestion problems on the M4, the changes could make access to some areas more difficult.
- <u>Heilbronn Way</u>: Experiences congestion at peak times.
- <u>Water Street</u>: Experiences congestion at peak times.

#### Within Pontardawe:

- <u>Tesco / Pontardawe Inn</u>: Experiences congestion at peak times.
- <u>The Cross</u>: Experiences congestion at peak times. There is little potential to improve road capacity to address traffic congestion in Pontardawe, the emphasis will need to be on managing access to the town.

# **Recently Completed Developments:**

The following schemes have recently been completed or are a priority for future years:-

- The Peripheral Distributor Road (PDR) Phase 2, also know as 'Harbour Way' was completed in October 2013. The new road eases congestion between J38 and J41 of the M4 by feeding traffic through the former docks regeneration area.
- Through the Regional Transport Plan, access to Kenfig Industrial Estate has been improved through the modification of an existing railway bridge with low headroom, allowing an alternative access for high sided vehicles. The bridge improvement scheme was completed in November 2012. The only previous access for high sided vehicles was through the narrow, suburban roads of North Cornelly, providing limited potential for development on the industrial estate as these have

consequent planning constraints on the number of high sided vehicles that could need access. These improvements allow these planning constraints to be removed and allow further development and business investment on the estate.

The new Baglan Energy Park Link Bridge forms an integral connection in a network route between Port Talbot and Swansea. It also facilitates significant improvements on the Port Talbot to Swansea Priority Bus Corridor. The aim of the project was to reduce journey times, particularly for buses, on the A4286, Afan Way, and the A48, through Baglan and Briton Ferry, whilst providing improved access into Baglan Energy Park, permitting continued growth in employment and investment. Baglan Energy Park is a significant employment development area identified in the Unitary Development Plan and the emerging Local Development Plan. The bridge was completed in April 2015

#### **Proposed Developments:**

 Cymmer Viaduct, a grade II listed structure, has failed its structural assessment and is in urgent need of replacement or bypass. The structure is on a bus route and is currently the only viable means of accessing the upper Afan Valley. In 1999, as an interim measure an 18 tonne weight limit and a single lane working, controlled by traffic lights, were introduced. The structure is deteriorating and will require a full replacement or ultimately closure to traffic combined with the provision of a new route to the upper Afan Valley.

- Interest has been shown from the multinational engineering company, AECOM, in providing an innovative underground hot water heating system linking individual buildings up to a kilometer apart, enabling buildings to be heated remotely. The company is looking to provide heating to commercial public buildings as well as domestic properties and propose to route the underground heating pipes along the public highway.
- The electrification of the main Swansea Paddington railway line will see extensive road bridge accommodation works. Electric trains require greater headroom to operate and Network Rail are currently engaged in preparing the programme for the improvement programme

# 4.3 Utility Activity

Activity by Statutory Undertakers and other Utilities can have a major effect on the maintenance and management of the road assets which can generally be detrimental to the life cycle of the asset.

All statutory undertakers are responsible for carrying out their own reinstatements although they must be to Department of Transport standards (see New Roads and Streetworks Act 1991 – Specification for Reinstatement of Openings in the highway).

At present NPT, in line with Department of Transport standards, enforces a 2 year maintenance period on all reinstatements and 3 years on any excavation greater than 1.5 metres.

Neath Port Talbot CBC as part of its Statutory duties inspects a random sample of 30% of Utility Works during the following three stages of excavation:-

- During the process of excavation.
- Within 6 months following interim or permanent reinstatement of the works.
- Within the three months prior to the end of the maintenance period.

Any remedial works required during the maintenance period are completed by the Utility Company, reducing any potential future deterioration of the highway asset and unnecessary costs to the Authority.

NPT is committed to improving co-ordination and standards of utility works and meetings are held on a quarterly basis with all Statutory Undertakers and neighbouring authorities in an effort to improve forward planning and help extend asset life cycles. Co-ordination and monitoring is important, not only to minimise delays to the travelling public, but also because the Council is often criticised for delays caused by traffic management implemented by Utilities for reinstatements and repairs.

### 4.4 Climate Change

It is very difficult to forecast changes in climate but there has been an acceptance that general weather patterns are changing. The noticeable changes in the past few decades have seen a number of severe winters and increased rainfall. Some winters have been prolonged with long periods of minus temperatures and heavy snowfalls. Also, increased rainfall has resulted in short heavy downfalls producing localised flooding whilst prolonged periods of lighter longer lasting rainfall have resulted in land becoming saturated and flooding as a result of excessive surface water run-off. Furthermore it is envisaged that with the increasing severity of weather conditions flooding will become more prevalent providing increased infrastructure budget pressures.

As a consequence of the recent severe winters the Authority made the decision to provide a new salt barn providing additional capacity thereby increasing the resilience of the salt stocks in an effort to ensure the Strategic Network remains accessible during severe weather conditions. A drainage unit has been established within Streetcare which, combined with a systems review and additional resources for culvert cleaning, has led to significant improvement in drainage information and cyclical maintenance.

# 4.5 Changes in Legislation

Changes in legislation often means the Council having to react and adapt, which often means an increase in the cost of maintaining the asset. The Council is however currently producing a flood risk management strategy in line with legislation which will ultimately, amongst other outcomes, identify drainage systems with potential for highway flooding that may need to be addressed.

The Well-being of Future Generations (Wales) Act 2015 comes into force on 1<sup>st</sup> April 2016 and may have an impact going forward on decisions in relation to the future maintenance and management of road assets and on the way in which services are delivered.

# 4.6 Local / Regional Transport Strategy / Demands for Additional Assets

The following key transport issues have formed the basis for the development of the Regional Transport Plan:-

- Road traffic volumes in the region and pressures in terms of unreliable journey times, localised congestion, reduced air quality, increased noise, vibration and carbon emission issues.
- Road safety issues and associated public concerns: Whilst there has been a general reduction in serious injuries and deaths from road traffic collisions, there are wide variations across the region and for particular road users' categories.
- Disparities in car ownership and use: Whilst overall both have increased, growth has not been consistent across the region. Those with cars are able to participate in a far wider range of opportunities than those reliant on public transport, walking or cycling for mobility.
- Variations in Public Transport provision: These broadly match population distribution, with higher frequency services and better coverage to the south and east of the region, where the majority of the population live, with less extensive provision in the more sparsely populated rural areas. Rail, bus and coach services are provided by private sector companies through

mainly commercial services along with services supported with Welsh Government funding.

• Access constraints: Physical access to bus and rail services remains a barrier to mobility impaired in some locations.

Other key issues that have influenced the Regional Transport Plan include:-

- Freight operation is an essential contributor to the economy but is planned and delivered by the private sector within European and UK legislative processes.
- Ports and Shipping facilitate the movement of passengers and freight to and from the region and are a critical link in the national supply chain network.

The Regional Transport Plan (RTP) links with the National Transport Plan for Wales and overall the Vision for South West Wales is to:

"Improve transport and access within and beyond the region to facilitate economic development and the development and use of more sustainable and healthier modes of transport."

From this vision stems the following strategic objectives:-

- To improve access for all to a wide range of services and facilities including employment and business, education and training, health care, tourism and leisure activities.
- To improve the sustainability of transport by improving the range and quality of, and awareness about, transport options, including those which improve health and well being.
- To improve the efficiency and reliability of the movement of people and freight within and beyond South West Wales to support the regional economy.
- To improve integration between policies, service provision and modes of transport in South West Wales
- To implement measures which make a positive contribution to improving air quality and reducing the adverse impact of transport on health and climate change, including reducing carbon emissions.
- To implement measures that help to reduce the negative impact of transport across the region on the natural and built environment, including biodiversity.
- To improve road safety and personal security in South West Wales.

The long term strategy in the Regional Transport Plan developed in conjunction with stakeholders identifies:-

- Improving land use and transportation planning through the use of Accessibility Planning, to ensure that development is properly located.
- Improving strategic east/west road and rail links to create more reliable internal connectivity and improved connectivity with rest of Wales, the UK and European neighbours.
- Improving Strategic Bus Corridors to create more reliable and attractive connectivity between key settlements.
- Promoting integration to encourage more sustainable travel choices and reduce the barriers to interchange.
- Improving safety in transport to reduce personal injuries and fears for personal safety.
- Providing more and better information to raise awareness on the range and use of sustainable transport options.
- Improving linkages between key settlements and strategic employment sites – to create a range of attractive passenger transport and walking and cycling opportunities linking key

settlements with their hinterlands and with strategic employment sites.

• Improving the efficiency of the highway network – through a range of appropriate mechanisms including demand restraint.

Furthermore a range of policies are identified under the following broad headings:-

- Reducing Greenhouse gas emissions and other environmental impacts from transport.
- Integrating local transport.
- Improving access between key settlements and sites.
- Enhancing International Connectivity; and Increasing Safety and Security.

Within the current plan, proposed developments relevant to the Neath Port Talbot area are:-

- Port Talbot to Swansea Bus Corridor.
- Neath (Llandarcy) to Swansea Bus Corridor.
- Port Talbot Parkway Station development.
- Park and Share sites close to M4 junctions.
- Neath Railway Station Improvements.

#### 42 Page 140

- Multi Modal Freight Facility Margam Wharf.
- Coed Darcy southern link.
- Swansea Valley to City Centre Bus Corridor.
- Bus priority corridor between Port Talbot Parkway and Bay Campus
- Port Talbot to Neath Bus Corridor.
- Pontardawe Cross Valley Link Bridge.
- Cymmer bridge and associated works
- Baldwins Bridge joint scheme with City & County of Swansea
- Port Talbot Modal Interchange
- Relocation of Neath town centre bus station

#### 5 Levels of Service

#### 5.1 Establishment of Levels of Service

Levels of Service are "the defined service quality (service standards) in respect of particular asset components against which performance can be measured for the benefit of users"

Levels of Service are composite indicators that reflect the social, economic and environmental goals of the community and may relate to safety, availability, accessibility, condition, environmental impact, customer service and financial performance (cost). Ideally, levels of service should create visible linkages between user needs, corporate objectives and any works undertaken on the asset.

The connection between customer expectations and what can, in practice, be delivered needs to be understood and communicated to stakeholders. It is also important that everyone involved in the process is aware that decisions, which impact on service delivery, need to align with the overall policies and objectives of the Council.

Defined levels of service are the realistic aspirations that a Highway Authority strives to meet reflecting statutory obligations, corporate goals and customer expectations in delivering highway services. Levels of service need to consider the preservation and physical integrity of the asset, and also meet the demands of safety, availability and accessibility. Key requirements affecting the development of levels of service are:

- Legislative requirements: It is a requirement that levels of service comply with the legal obligations and statutory duties incumbent on a Highway Authority. Additionally, the adoption of recognised codes of practice will provide the necessary guidance to align service delivery with national best practice.
- Policy and objectives: NPT sets out its policies and corporate objectives in documents such as the Local Transport Plan and Highway Maintenance Plan. Levels of service are not only determined by local objectives as there need also be an acknowledgment of the wider national targets set out by the Government. As a consequence, the budget and asset planning process is designed to enable strategic choices and decisions to be made in an informed manner, so that the council can manage its budgets and services with due regard for prudence, stability, investment and efficiency.
- **Customer expectations**: The expectations of all road users, the community and local businesses need to be recognised as a factor in the service level decision making process. The provision of better information will enable consultation with customers on a more informed level.

- Best practice guidelines: A number of best practice guidelines exist that directly influence levels of service. While these best practice guidelines are not always statutory requirements, they represent a description of accepted good practice. This can be particularly important in ensuring that assets are protected against public liability claims. The most significant best practice guidance documents relevant to this Plan are the Code of Practice for Highway Maintenance Management, the Code of Practice for Road Lighting Management and the Code of Practice for Management of Highway Structures.
- Affordability: Service options set out to consider the most economically efficient way of delivering an acceptable level of service over the long term. Pressures on council funding and increasing demands on the highway network mean it is not always possible to secure the required funding to deliver the desired solution, and budgets influence what can realistically be achieved. Affordability must therefore be recognised and acknowledged when setting deliverable levels of service
- Availability of resources: The availability of suitably skilled resources throughout the construction industry is limited and, because of the proposals to rapidly accelerate delivery, targets can sometimes be difficult to achieve.

#### 5.2 Measurement and Reporting of Levels of Service

An asset management approach provides existing and projected data to support the decision making process. In practical terms this provides the necessary information to make informed choices regarding the identification and assessment of service needs.

Once the requirements driving an asset group's service level have been determined it is necessary to develop service options around these requirements, and evaluate them. This process should clearly identify the service options applicable to the particular asset group.

As noted previously, service delivery can be influenced by a number of demands such as legislation, best practice guidelines, Health and Safety requirements, corporate goals, political influences, customer expectations and financial constraints. The aim is to improve service provision through developing or altering current practices, as part of developing NPT's HAMP, by a process of continued monitoring and review.

In setting its own standards for asset groups NPT has considered the following set of generic service levels:

• **Statutory Minimum:** Meeting statutory or legislative requirements and notes for guidance only.

- **Existing:** The impact on the asset if current funding levels are maintained.
- **Steady State:** To arrest deterioration of the asset and maintain current condition, performance and value.
- **Prescribed Service:** An enhanced standard based on customer expectations and/or political aspirations.
- **Optimum Service:** An optimum level of service based on long term economic lifecycle planning.
- Attainable Service: A reinterpretation of the Optimum Service in light of available resources representing the best long term return for available shorter term funding.

Ultimately, the chosen option must be a result of a combination of cost, benefit and risk. Depending on the asset category, the options evaluation criteria include:

- Programmes and planning
- Safety implications and requirements
- Availability of service or asset
- Accessibility to service or asset
- Condition of the asset
- Environmental impact of providing and maintaining the asset
- Customer service, expectations and perceptions

#### 48 Page 146

- Risk and benefits
- Finance
- Performance targets

In respect of adopted and specified service standards the asset management process will monitor, review and report on progress and performance. As such, levels of service, where possible will need to be measurable and realistic having performance targets that can be set out and measured using appropriate indicators, including:

- National Indicator Set measures (NIS's)
- Local Performance Indicators (LPI's)
- Recording of Response Times
- Customer Complaints Monitoring Procedures
- Condition Surveys

To inform the monitoring process, the tables on the following pages give examples of asset inspection regimes, maintenance criteria, and response standards, and these along with other information is detailed within the Councils Highway Maintenance Plan:-

## Table 5.2.1 Network inspection regime - frequency of

intervention requirements.	
'Knocked Out' Kerb	As above (*)
Hazardous debris or obstruction in the	2 Hours
carriageway, missing covers	
Flooding or surcharging highway drainage	2 Hours
system	

(\*) Response time prescribed, including any intermediate timescales,

at Inspectors discretion based on risk

#### Table 5.2.4 Inspection Regime For Structures

Bridges, Culverts, Retaining walls and Cattle Grids	
Inspection Category	Frequency
General	2 Years
Principal	6 Years
Special	As Required (*)

(\*) Special Inspections can be conducted following a collision or flooding or where an abnormal load is to pass.

Other Highway Structures, Culverts, Retaining walls etc	
Inspection Category Frequency	
General	2 Years or receipt of report/complaint

When for particular circumstances more frequent inspections are required on individual structures these are identified in the 'Structures Database'.

## Table 5.2.5 Cyclic Maintenance Frequencies

Activity	Frequency
Gully Cleansing	
General	Bi-annually
'critical' sites	Additional clean between April - July
Grass Cutting and Hedge Trimming	As per detailed schedule but typically,
Adopted R'bouts & Islands	Minimum 4 cuts per year
Grassed Verges	Minimum 4 cuts per year
Highway Flail Cutting Sites	Minimum 1 cut per year
Safety Cutting	Additional cuts where unusual growth has
	created a hazard
Verge Maintenance	Programme of spraying twice per year in
Weed Spraying (footways)	Summer
Application of Retarders	Not Used
Noxious Weed Removal	Ragwort – As and when required (pulled up)
	Japanese Knotweed – Selected areas per
	year (sprayed)
Activity	Frequency
Siding	
General	Where vegetation encroaches by 300 mm as
	identified by Inspectors
Cleansing	
General	Litter pick –Minimum - 4 times / year - max
	daily
	Sweeping –Minimum - 4 times / year -max
	weekly

## Table 5.2.6 Maintenance Of 'Aids To Movement'

Activity	Frequency
Traffic Signal Maintenance*	
Fault Attendance	Urgent fault - 2 hours
Repair Inspection	Non - urgent – 24 to 72 hours
Sign Cleaning	
Class I Roads	
Class II and Class III	As required to preserve safety
Unclassified Roads	
Road Marking	
Reinstatement**	
Class I, Class II	As required to preserve safety
and Class III Roads	
Unclassified	
Reflective Stud Replacement	
All Classes	As required to preserve safety

\* Bulk changes may only be undertaken at certain times during the week at specified locations.

\*\* Road markings affected by maintenance works or surface dressing are reinstated within 14 days of the works being completed.

Repair of Faults		
Category of Fault	Minimum Attendance and	
	Assessment Time*	
	11116	
Outages		
Illuminated 'Aids to Movement'	4 working days	
Lighting unit	4 working days	
Section of Lighting	Same day	
Emergency		
To make safe potential electric danger	2 hours	
Repair of traffic bollards, No Entry –	2 hours	
signs		
and Belisha Beacons		

## Table 5.2.7 Maintenance Of Street Lighting And Illuminated Signs

## **Cleaning and Servicing**

Installation	Frequency
Signs and Bollards	Every site visit
Lighting Units	On lamp repair

#### Fault Detection

Approximately 70% of the Council lighting stock is controlled by Computer Management system (CMS) which allows automatic nightly fault reporting.

## 5.3 Performance Review

Alongside measurement and reporting of Service level performance and the production of periodic Annual Status and Options reports, actual performance can, as appropriate, be compared from time to time with the predicted or targeted performance at the time of establishing the management and investment strategies for a given asset. In any event a summary performance report will be presented annually to the Council's Capital Programme Steering Group and Environment Management Team, in consideration of which any amendments to levels of service and investment will be considered alongside the business planning process for individual service areas.

## 5.4 Existing Level of Service

A summary of asset performance against the existing level of service is given in Table 5.4.1 below:-

## Table 5.4.1 – Performance against existing Level of Service

Level of Service	Existing Level of Service	
Sub Category		
Carriageways (classified)		
Condition	SCANNeR surveys show an improvement in the	
	condition of the Classified network. The condition	
	of the Classified network in NPTCBC is greater	
	than the Welsh national average	
Investment	A cut in the level of investment will see	
	deterioration in the highway asset and the value	
	will decline. Reactive maintenance costs will	
	increase as a result.	
Safety implications	Deterioration will increase the safety risks to road	
	users, in the absence of increasing reactive	
	maintenance requirements.	
Carriageways (unclassifie	d)	
Condition	The in house visual inspections results show a	
	steady increase in the condition of the Unclassified	
	network year on year between 2010 and 2014.	
	The improvement can be attributed to additional	

	investment under Welsh Government Local	
	Government Borrowing Initiative. Also, the	
	<b>č</b>	
	carriageway works programme has had a period of	
	greater priority following previous investment in	
	dealing with sub-standard footways	
Investment	Continuing at base budget levels, without additiona	
	funding, will see deterioration in the highway asset	
	and in the asset value	
Safety implications	Further deterioration, increasing risks to safety of	
	road users in the absence of increasing reactive	
	maintenance budgets.	
Footways		
Condition	In-house visual inspections carried out between	
	2009 and 2015 indicate an overall deterioration in	
	the footway network, despite an investment	
	programme that targeted areas of heavy	
	deterioration. Carriageway programmes have had	
	a period of greater priority over footway works	
	which is now being reviewed	
Investment	A rise is anticipated in claim related costs if decline	
	is allowed to continue.	
Safety implications	Deterioration will increase risks to safety of road	
	users' in the absence of increasing reactive	
	maintenance budgets, or greater priority to planned	
	works	
Structures		
Condition	Bridge Condition Index indicates average condition	
	as 87-89 (good) however, 19 sub-standard bridges	
	currently remain in service and are monitored in	
	accordance with BD79	
Investment	Funding limited to historical budget. 65% of the	
-	5 ·······	

	2,290 structures have maintenance or repair works	
	identified in Structures Work Pool.	
Safety implications	Sub standard bridges require monitoring as a	
	requirement of Code of Practice Management of	
	Highway Structures.	
Street Lighting		
Condition	Aged stock.	
Investment	Major £21 million infrastructure renewal project	
	funded from Council resources currently ongoing	
	following asset status report and options	
	consideration.	
Safety implications	Risk of column and electrical cabling declining with	
	ongoing investment programme.	
Highway Signs		
Condition	'Reasonable', with some signage life expired.	
Investment	Essential renewals currently ongoing.

Safety implications          Traffic Signals         Condition         Investment         Safety implications         Safety Barriers	Any missing mandatory signs in particular are a safety concern.         'Reasonable', with some equipment life expired.         Essential renewals currently ongoing         Fault repair system operated.         Repairs and upgrades were carried out following a 2009 inventory/condition survey and following the	

	specialists in 2019.	
Investment	To be identified.	
Safety implications	Specific locations are being looked considered,	
	where the road edge requires engineering works	
	before the barrier can be renewed.	
Drainage		
Condition	Inventory of gullies and culverts is held but	
	condition details of individual assets are not	
	recorded. An inventory of connecting carrier drains	
	is being built and is ongoing.	
Investment	Reactive maintenance carried out as and when	
	identified.	
Safety implications	Reactive/planned works carried out as and when	
	identified.	

## 5.5 Target Levels of Service

Initial target levels of service are given below. However these may need to be revised once the Council's latest Forward Financial Plan has been finalised and its full impact evaluated.

## Table 5.5.1 – Initial Target Level of Service

Main Asset Groups	Initial Target Level of Service	
Carriageways -Classified	Steady State – with aspirations to move to a	
	prescribed service level of no more than 5.6% of	
	individual road classification requiring maintenance.	
Carriageways -	Steady State – with aspirations to move to a	
Unclassified	prescribed service level of no more than 3.0%	
	requiring maintenance.	
Footways	Steady State – with aspirations to move to a	
	requested service level of no more than 13.5% of the	
	footway network requiring maintenance.	
Structures	Steady State - with resolution of "Cymmer Bridge"	
	issues.	
Street Lighting	Prescribed Service – On completion of ongoing	
	Improvement Programme.	
Highway Signs	Steady State – with aspiration to move to a	
	requested service level where less than 5% of signs	
	are missing or badly damaged.	
Traffic Signals	Steady State.	
Drainage	Steady State.	
Safety Barriers	Steady State.	

#### 6 Lifecycle Planning

## 6.1 Purpose and Importance of Lifecycle Planning

As part of the development of this plan, we will create lifecycle plans to consider each of the main asset groups. Each lifecycle plan considers:-

- Inventory (amount of asset)
- Condition and trends
- Maintenance options / Service levels / Risk Management and Minimum requirement
- Establishing maintenance strategies / service standards

Periodic updating of the lifecycle plans enables local knowledge to be captured and considered.

#### 6.2 Output from Lifecycle Planning

The output from the lifecycle planning process provides 20 year financial and other projections linked to target levels of service, to inform the Council's 3 year Highway Maintenance Proposals.

Lifecycle plans are essential to Highway Asset Management planning to provide the longer term context with which to consider asset management practices, investment, performance and risk management consistently across all asset groups.

## 6.3 Lifecycle Plan Contents

Lifecycle plans are working documents, updated periodically as information is gathered and analysed on each asset group. When fully populated each Life Cycle Plan will contain the following information:-

Section	Answers	Contains
The Asset	What assets do the council own?	<ul> <li>Inventory details (type size, etc)</li> <li>Asset growth statistics</li> </ul>
Service Expectations	What is each asset group required to do?	<ul> <li>Customer expectations</li> <li>Council objectives for transport</li> <li>Specific user requirements</li> <li>Safety considerations,</li> <li>3rd party use</li> <li>Environmental requirements,</li> <li>Network availability,</li> <li>Amenity considerations</li> </ul>
Management Practices	How is this asset group managed?	<ul> <li>Policies</li> <li>Inspection Regime</li> <li>Condition Assessment</li> <li>Asset Acquisition standards</li> <li>Routine Maintenance standards</li> <li>Operational/Cyclic Maintenance</li> <li>Planned Maintenance standards</li> <li>Disposal standards</li> </ul>
Investment	How much is being spent and should be spent over the longer	<ul> <li>Historical Investment</li> <li>Output from historical investment</li> <li>Forecast Financial Needs</li> </ul>

	term on this asset group?	Valuation: GRC, DRC & ADC
Works Programme	How are works programmed for this asset group?	<ul> <li>Existing forward works programme</li> <li>Works programme coordination</li> <li>Option Appraisal: treatment selection <ul> <li>at a project level</li> <li>at a budget category level?</li> </ul> </li> </ul>
Risk	What are the risks associated with this asset group?	<ul><li>Risk identification</li><li>Major asset risks</li></ul>
Works and Service Delivery	How are works delivered or procured on this asset group?	Approved processes
Performance Measurement	How is the performance of this asset group measured and Managed.	<ul> <li>Performance indicators</li> <li>Current performance figures</li> <li>Target performance figures</li> </ul>

Section	Answers	Contains
Strategies	What strategies are there for the future management of this asset group?	<ul> <li>Relevant Strategy Information</li> </ul>
Service Improvement actions	What improvement would enhance the council's management of this asset group?	<ul> <li>Asset specific improvement actions</li> </ul>

## 6.4 Status of Lifecycle Plans

Lifecycle plans are being produced for each of the asset groups and their current status is noted in the table below:-

Asset Group	Status	Comments
Carriageways	Update of the	More work required
	Plan approaching	
	Completion	
Footways	Update of the	More work required
	Plan approaching	
	Completion	
Bridges and other	Update of Plan	More work required
highway structures	approaching	
	completion	
Street Lighting	Update of Plan	Phase 3 of £21million investment
	pending	currently underway. Approximately
		11,000 units replaced/upgraded
		with modern luminaire and Central
		Control Management system.
		Phase 3 will include some LED
		luminaire investment. On project
		completion (expected in October
		2017) another lifecycle plan will be
		produced for the new infrastructure
		aimed at maintaining the level of
		service the project set out to

		achieve.
Asset Group	Status	Comments
Drainage	Not started	Asset inventory for culverts
	(Major culverts	complete. Asset inventory for gullies
	are covered by	complete but data required for
	the Highway	interconnecting drain systems.
	structures	Filling this performance gap is the
	lifecycle plan).	next step in plan development.
Traffic Signals	In progress	Traffic Signals. 65% Plan requires updating.
Highway Signs	In progress	Existing plan requires updating
Safety Barriers	Approaching	A Safety Barrier replacement
	completion	programme has been completed
		since the last HAMP. A general
		survey is to be undertaken in 2016
		to assess the asset condition and to
		formulate a Lifecycle Plan.

## 6.5 Status and Options Report (for Major Asset Groups)

Annual or periodic Status and Options reports are being produced for each of the major asset groups and their current status is noted in the table below:-

Asset Group	Proposed	Status	Comments
	Frequency		
Carriageways	Every 2 years	Final draft	Final approval
		completed	Required.
Footways	Every 2 years	Initial draft	Further work
		completed	Required.
Bridges and other	Periodic	Final draft	Final approval
highway		completed	Required.
structures			
Street Lighting	Periodic	Completed.	Review to be
		Currently on	commenced upon
		year 3 of 5 year	completion of 5 year
		action plan.	infrastructure renewal
			project.
Drainage	Every 3 years	Not started	
Traffic Signals	Every 3 years	Not started	
Highway Signs	Periodic	Not started	
Safety Barriers	Every 3 years	Not started	To be produced on
			completion of April 2016
			inventory / condition
			survey.

Status and Options Reports will provide an update on the relationship between existing / future budget options and the predicted condition of the asset over a 20 year cycle. Monitoring this relationship will provide data to make more informed decisions going forward.

#### 7 Financial Summary

## 7.1 Sources of Funding and Budget Allocation

Investment in the Highway Asset is derived from the following funding streams:-

<u>Revenue:</u> Revenue funding is dependent on Council expenditure priorities in the context of available income which is derived from Welsh Government Revenue Support Grant, non-domestic rates, Council Tax and any other specific Grants. The majority of funding is therefore derived from Welsh Government and the total budget allocated to Road Maintenance is split between a number of service headings based, in the past, in large part on historical precedence.

Where additional funds are made available to assist with ongoing maintenance and management of road assets, such as Road Maintenance Grants, individual cases are put forward internally within funding guidelines for consideration following which allocations are made in accordance with Member priorities.

<u>Capital:</u> Capital Investment is generally funded by Welsh Government (WG), who provide a supported borrowing element forming the Authority's base capital budget. WG also include an element within the Revenue Support Grant to cover the debt charge repayments on this borrowing.

The capital base budget allocation is further supplemented by:-

- Unsupported borrowing (prudential borrowing)
- Capital Grants & Contributions
- Capital Receipts
- Direct Revenue Financing

Capital Investment Plans are reviewed by relevant Management Teams and approved by relevant Committees within the Council.

Should there be a requirement to fund additional specific projects from Prudential Borrowing, a full Options Appraisal exercise has to be undertaken for all major projects. The Appraisal normally considers amongst other issues the objectives of the Council, alternative options and the affordability of loan repayments from existing revenue resources.

<u>Grants:</u> The Council submits annual Bids for additional funding to the government in respect of Transport Grant, Safe Routes to Communities and Regional Transport Consortia Grant (RTCG) including Road Safety Schemes and regional transport packages. In addition the council does, from time to time, receive additional Grants such as Special Road Maintenance Grant which is distributed to local authorities based on Road Standard Spending Assessment (SSA) and is governed by strict criteria.

Within the Revenue and Capital allocations determined by Council any virement of funds between Service Headings to reflect need are dealt with at Head of Service level within the Environment Directorate as far as Revenue is concerned, and within the Corporate Capital Programme Steering Group as far as Capital is concerned. Any virement in excess of £100k is dealt with at Corporate Director level.

## 7.2 Historical Expenditure

Historical investment in roads assets over the last 4 years is as follows:-

Asset	Works	2011/12	2012/13	2013/14	2014/15
Carriageways	Planned	£1,608,223	£1,401,065	£1,136,227	£1,342,000
	Reactive /				
	Routine				
Footways	Planned	£179,000	£224,125	£36,257	£49,264
	Reactive /				
	Routine				
Structures	Planned	£650,000	£319,085	£424,987	£334,190
	Reactive /	£266,623			
	Routine				
Street lighting	Planned	£2,000,000	£2,392,819	£5,474,096	£4,112,188

Traffic Signals	Reactive		Not available	Not available	Not available	
Safety Barriers	Planned		£50,000	£50,000	£50,000	
Results of safety barrier inventory / condition survey due May 2016 from which future budget requirement can be determined.						

## 7.5 Asset Valuation

Asset Type	Gross	Accumulated	Depreciated	Annualised
	Replacement	Consumption	Replacement	Depreciation
	Cost		Cost	Cost
Carriageway	888,996,267		821,565,025	4,745,409
Footways	213,000,000		195,000,000	Not available
Structures	251,638,519		247,847,598	708,378
Street Lighting	16,000,000*		Not available	Not available
Signs	Not available		Not available	Not available
Drainage	Not available		Not available	Not available
Traffic Signals	Not available		Not available	Not available
Crash Barriers	£4,309,964**		Not available	Not available

\* Based on Prudential Capital sum borrowed to replace 95% of existing stock over a 5 year period.

\*\* Based on actual renewal costs averaged per metre run on sample jobs for removal of old, erect new and traffic management costs.

#### 8 Risk Management

#### 8.1 Corporate Risk Management Strategy

Neath Port Talbot CBC has in place a Risk Management Policy (RMP) that describes a structured, systematic and focussed approach to managing risks and exploiting innovation at a corporate level. It promotes a work environment where innovation is encouraged and supported and is a key enabler of the Council's change programme.

The RMP defines risk as "The threat that an event, action or inaction will adversely affect the Council's ability to deliver its services"

This Policy applies to all of the activities of the Council and covers all aspects of Risk Management.

The Council's supporting risk management framework is designed to ensure risk management is effective. Roles and responsibilities for managing risk are clearly assigned and the key risk management business processes are aligned to form a coherent, corporate management system.

The framework (figure 8.1.1 overleaf) illustrates how risk will be managed at different levels in the organisation and how that information will be used to influence corporate priorities and the allocation of resources:-

- Stage 1 relates to service risk assessments at the operational level
- Stage 2 covers risk assessment at the corporate level which will provide information to inform both the Council's Forward Financial Plan and Strategic priorities for improvement.
- Stage 3 is the mechanism by which risks can be shared with partners via the Local Service Board.

Figure 8.1.1 Neath Port Talbot CBC's Corporate Risk Framework

# **Insurance** Insurance programmes are in place for funding the financial consequences of risk. However, it should be recognised that some elements of loss will be uninsurable e.g. damage to employee morale and the Authority's reputation

#### 8.2 Risk Identification

Risk to the Council's business can take a variety of forms such as financial risk, risks to project and service delivery, its reputation, partnerships, employees and Councillors. Those risks could affect the Council's performance, its assets, stakeholders, customers or members of the public. They can also affect the Council's viability.

Risk identification is undertaken by all Officers as part of daily activities such as Safety Survey Inspections which can vary between asset types, customer enquiries or staff appraisals.

The Council's key risk management processes for identifying risk are as follows:

<u>Health & Safety at Work:</u> Processes for evaluating the risk arising from a hazard(s), taking into account the adequacy of any existing controls, and deciding whether or not the risk(s) is acceptable, are now well-embedded across the Council. External quality assurance of the Council's risk management arrangements is in place and there is clear evidence of risk being prioritised, resourced and evaluated at operational, service and corporate levels.

Improvement Planning: Risk assessments are undertaken as part of the annual business and corporate planning processes. Risks are

analysed, resourced and prioritised for action. These processes are subject of external audit by the Council's regulators.

<u>The Council's Transformation Programme:</u> Risk management is an integral feature of the Council's programme and project management approach which underpins the Transformation Programme. For the Council's priority Tier 1 programmes, risks are actively managed by the relevant Programme Board with a corporate risk register also maintained for the whole of the Transformation Programme. The management of risk across the Transformation Programme is subject of audit by the Council's external regulators.

<u>Business Continuity:</u> Business continuity management is a process which analyses the impact on a business which directly affects the services provided by the Council. Its purpose is to identify critical activities and functions that have to continue at a minimum during a disruption of service delivery or when responding to an emergency.

<u>Operational Risk Management:</u> In addition to those risk processes outlined above there are a number of service / operational risk systems to be considered when identifying corporate risks. Details of significant risks in relation to the individual asset groups can be found in Service Business Plans and/or Lifecycle Plans associated with this HAMP.

This policy builds upon the existing risk management processes but introduces a consistent approach to the management of risk and describes how processes will be integrated at the directorate and corporate level to produce directorate and corporate risk registers.

#### 8.3 Risk Categorisation

Risk may be categorised in a number of different ways but in the context of the Highways function it is useful to look at:-

- Strategic risks
- Tactical risks
- Operational risks.

This split mirrors the level at which these risks are managed within the Authority, with corporate senior managers looking at strategic risks, tactical risk being managed at network management and Head of Service level, and operational risk being managed at a site and service delivery level.

<u>Strategic risks:</u> These are service wide risks which may be beyond the control of the management team and could include resource availability, finance and political priorities. Although it may not be possible to control all of these, it is appropriate that they are recognised so that, should they occur, they do not come as a complete surprise. In extreme cases the strategic risks could affect the long-term aims and objectives of the Council and will be identified and managed by Corporate Management Team as part of the corporate risk management process, planning and strategy development and service best-value reviews.

<u>Tactical risks</u>: These are risks that can affect the Council's ability to deliver annual programmes to the approved budgets. Examples of these include adverse weather, changes in customer influences and level of service. Tactical risks are those most likely to be managed through the asset management planning process with actions likely to include, varying levels of service and programme amendment. These are generally risks that could adversely impact on medium-term plans and will be identified and managed by the Environment and Streetcare management team as part of the annual planning process.

<u>Operational risks</u>: These are risks encountered on a day-to-day basis as the authority manages and runs the network. Examples could include service delivery, repair failure etc. Operational risks are those that could adversely affect the service delivery programme in the short term. These will be identified and managed by the appropriate service delivery teams as part of the day-to-day management of the network.

#### 8.4 Risk Evaluation and Control

A manager's risk tolerance level is based on their knowledge, skills and experience which is ultimately subjective to the individual. One of the key aims of this policy is to help managers view risks in a consistent way and ensure the Council has a balanced "risk appetite". In assessing the risk a standard Risk Matrix is used, as shown in table 8.4.1

	Кеу							
Likelihood	Impact		5	5	10	15	20	25
			4	4	8	12	16	20
1. Very likely	1. Low 2. Low /	poo	3	3	6	9	12	15
2. Unlikely	Medium	_ikelihood	2	2	4	6	8	10
3. Likely	3. Medium		1	1	2	3	4	5
4. Very	4. Medium /		0	1	2	3	4	5
Likely 5. Certainty	High 5. High				In	npact		

## Table 8.4.1 Standard 5 x 5 Risk Matrix

There are a variety of options for the control / treatment of identified risks and starting with those with the highest probability consequences rating the appropriate treatment is selected from the following:-

- mitigate
- monitor
- prevent
- insure against
- do nothing

The process is reviewed periodically to ensure that any new risks are properly managed, and documented with supporting documentation as appropriate. When reviews are undertaken these records are kept to provide evidence of the process having been followed correctly and to provide a basis for the next review.

## 8.5 Monitoring, Reviewing, Reporting and Risk Register

<u>Corporate Risk Register</u>: A review of the Corporate Risk Register by Corporate Directors Group is undertaken biannually (twice a year). The reviews include the production of verifiable evidence to accurately determine and measure the Authority's performance in mitigating / controlling the Corporate Risk Register. Typical inputs include the following although this list must not be considered exhaustive:

- the extent to which the risk is being controlled / mitigated
- follow up actions from previous management reviews
- changing circumstances including developments in legal and other requirements related to the risk which may need to be added to the register and re-prioritised

Information is collated by the Corporate Director in advance of each review to enable the Group to address the need, if appropriate for changes to the way in which the corporate risk is being controlled / mitigated and the appropriate resources allocated.

The Corporate Risk Register is reported to Policy & Resources Cabinet / Scrutiny Committee on an annual basis.

<u>Directorate Risk Register:</u> Directorate risk registers should be reviewed quarterly by Senior Management Teams. Reviews include the production of verifiable evidence to accurately determine and measure the Directorate's performance in mitigating / controlling the identified risks. Typical inputs include the following although this list must not be considered exhaustive:

- the extent to which the risk is being controlled / mitigated
- follow up actions from previous senior management teams reviews
- changing circumstances including developments in legal and other requirements related to the risk which may need to be added to the register and re-prioritised

Information is collated in advance of each review to enable to address the need, if appropriate, for changes the way in which the risk is being controlled / mitigated and appropriate resources allocated.

As part of the allocation of resources following production of lifecycle plans, status reports and option appraisals, a risk assessment process at a tactical level is carried out across the main asset groups as part of service business planning which thereby feeds into the Forward Work Programme and budget allocation processes.

## 8.6 Major Asset Risks

Table 8.6.1 below gives an indication of what have been / are considered to be NPT's Major Asset Risks:-

Risk	Current Controls in Place
Carriageways	
The Carriageway Lifecycle plan and	Regular condition surveys (SCANNER

failure.	Lifecycle Plan led to an options
	appraisal being undertaken. The
	preferred option, adopted as a
	corporate policy and included in the
	Forward Financial Plan, has resulted in
	a major infrastructure renewal
	programme being undertaken, to be
	completed in October 2017.

#### 9 Improvement Plan

#### 9.1 Milestones

Improvement action plans for each asset group are included in the relevant lifecycle plan. Table 9.1.1 below indicates improvements to date, together with key milestones identified for implementation as part of this plan.

Table 9.1.1:	Summary	y of Performance	Gaps and	Action Plan

Performance Gap	Milestone / Actions	Target Date
General		
Working practice	Complete gap analysis of working practices vs Codes of Practice	Some areas reviewed and completed – analysis ongoing
Carriageways		
Surface condition data gap	Extend carriageway condition surveys to all thoroughfares on unclassified network Utilise Survey Team to identify condition on scale 1 to 5	On going Completed
Need to review management of road c'way pavement with	Update condition survey Review approach and further develop strategy as necessary, making appropriate amendments to the HAMP and Highway	Completed 2015 Ongoing.
respect to skid resistance	Maintenance Plan as required.	

Performance Gap	Milestone / Actions	Target Date
Improved methods required for targeting of roads for preventative maintenance	Work nationally to develop 'deterioration modelling' to assist with works programming – since previous HAMP, condition data surveys have provided improved means to inform forward work programmes.	2013 - 2016 Ongoing works in line with the Wales – Scots national asset management framework contract.
Risk assessment and pavement management	Continue to explore potential benefits of the application of risk exposure indices in works programming.	Ongoing
Integrated computerised maintenance system for improved efficiencies	Development of in house 'system' using GIS.	Ongoing
Detailed overview of potential road schemes with costs, measurements and inventories	Development of a preparation pool to assist with maintenance planning and prioritisation.	Ongoing
Insufficient coordination with utilities for Forward Works Programme	Develop forward works programme to be coordinated where necessary with utilities.	Gas 5 year works plan received and incorporated into the programme consideration process.
Removal of some sound road surface in maintenance techniques.	Development of 'fit for purpose' preventative maintenance solutions as cheaper, sustainable and more environmentally friendly alternatives.	Trial areas identified through condition survey and incorporated into HAMP

Performance Gap	Milestone / Actions	Target Date
Footways		
Update condition of footway network	Utilise Survey Team to identify condition on scale 1 to 5 condition data used in preparation of annual works programme.	1 <sup>st</sup> survey completed in 2011 2 <sup>nd</sup> survey completed in 2013 3 <sup>rd</sup> survey completed in 2014 4 <sup>th</sup> survey completed in 2015
Improvement in coordination with utilities for Forward Works Programme	Develop forward works programme to be coordinated where necessary with street lighting cable replacement and utilities.	Gas utilities 5 year works plan received with planning underway. Ongoing
Risk assessment and works programme management	Continue to explore potential benefits of the application of risk exposure indicies in works works programming.	Ongoing.
Reduce expensive maintenance costs.	Development of preventative maintenance regime and use of new treatments as cheaper, sustainable and more environmentally friendly alternatives	Ongoing
Implement Inventory Population Strategy.	Gather Bridge element data through biennial general inspection programme.	Ongoing
Structures		
Implement Bridge condition indices	Transfer Condition data into CSS/Atkins Spreadsheet to allow direct comparison with other Welsh Authorities	Ongoing
Incomplete Bridge Detail Drawings/ Records	Transfer Survey and Microfilm details into AutoCAD Drawings	Ongoing
Bridge Key performance indicators	Extend KPI register to include for BCI, Availability, Reliability & Work bank	Ongoing
Retaining wall	Complete survey of retaining	2017

Performance Gap	Milestone / Actions	Target Date
gaps	walls	
Principal inspections on major structures	Principal inspections programmed (52 No.)	Ongoing
Compliance with the UK Bridges Boards Code of Practice for Highway structures	Implementation of the code's recommendations	Ongoing
Formal maintenance selection process	Prioritisation system to be applied to work bank	Ongoing
Drainage		
Some deficiency in Management of culverts	Review asset management arrangements for culverts as part inventory collection	Culvert database is 'substantially complete', line with Flood and Water Management Act 2010. Complete intake and outfall inventory exists and culvert /pipeline inventory is being collected
Lack of cyclic cleaning of 'problem pipe' sections	Cyclic cleaning of problem pipe sections with collection of condition data at same time	High risk areas identified with monitoring undertaken – development ongoing
Lack of detail for connecting drains forming part of gulley / highway drainage systems	Instigate inventory of connecting drains forming part of gulley / highway drainage systems.	On going
Lighting		
Address aged lighting stock	Implement Lighting Renewal Project for street lighting (excludes illuminated signs)	October 2017
Gap in data of underground cabling	Complete inventory of authority owned underground cable	Completed
Gap in data of	Complete inventory &	Ongoing

Performance Gap	Milestone / Actions	Target Date
controlled crossing infrastructure	condition survey of controlled crossing infrastructure	
No long term controller replacement investment profile	Identify investment profile for controller replacement to end of plan period	Ongoing
No long term Signal refurbishment investment profile	Identify signal refurbishment investment profile to end of plan period	Ongoing
Highway Signs		
Inventory out of date – requiring condition data	Completion of inventory data – requiring feedback from Neighbourhood Services.	Completed
Signs missing or need attention	Replacement of absent signs when identified – problems significantly reduced since last HAMP following investment under the Neighbourhood Service initiative.	Ongoing
Cleaning Backlog	Neighbourhood Services to complete cleaning backlog and thereafter continue with cyclical cleaning in accordance with HAMP	Backlog cleared. Routine maintenance on-going.
No rolling programme of replacement	Identify replacement programme starting with life expired stock	Continuous inspection / replacement regime in place
Crash Barriers		
95% of safety barriers data held in inventory	Compile inventory/condition data for safety Fences	Inventory completed 2009. 1 <sup>st</sup> complete condition survey undertaken in 2009, 4 year work programme completed 2 <sup>nd</sup> complete condition survey programmed for 2013. Inventory update is ongoing

Performance Gap	Milestone / Actions	Target Date
Other Assets		
No maintenance programme for other assets	Establish maintenance programme e.g. street furniture	Existing survey data to be rationalised. Development of programme for collection of required asset inventories – 2016

## 10 Management & Control of the Plan

## **10.1** Responsibility for Delivery

The following people are charge with the delivery of this Highway Asset Management Plan. Their roles are as follows:

Post / Position	Name	Role
Environmental	Not applicable	Draft approval of the HAMP
Management Team		
Environment and	Not applicable	Approval of the HAMP
Highways Cabinet		
Committee		
Capital Programme	Not applicable	Monitoring of financial information
Steering		relating to the HAMP
Group		
Head of Streetcare	Mike Roberts	Allocate and prioritise resources
Services		to facilitate implementation of
Highways and Drainage	Steve Owen	asset management strategies and
Manager		provide a link to corporate
Neighbourhood Services	Andrew Lewis	strategies in consultation with
Manager		other sections as necessary.
Asset / Traffic &	lan Carter	Co-ordinate asset management,
Programme Manager		development and updating of the

## Agenda Item 12

#### NEATH PORT TALBOT COUNTY BOROUGH COUNCIL

Environment and Highways Cabinet Board 10 December 2015

> Report of the Head of Streetcare Mike Roberts

Matter for Decision

Wards Affected: All Wards

#### Flood Risk Management Plan 2015-2021

#### Purpose of Report

1 To consider for approval the Council's draft Flood Risk Management Plan for submission to National Resources Wales.

#### Background

- 2 The draft plan has been produced as part of fulfilling the Council's role as a Lead Local Flood Authority, a new duty placed upon the Authority under the Flood Risk Regulations 2009. Under the legislation a plan has to be in place by 22<sup>nd</sup> December 2015.
- 3 The Flood Risk Management Plan is the final element in a process set out under the Flood Risk Regulations 2009 which required the preparation of:
  - a) A Preliminary Flood Risk Assessment
  - b) Flood Hazard and Flood Risk Maps
  - c) A Flood Risk Management Plan
- 4 The plan links closely to Neath Port Talbot's Local Flood Risk Management Strategy, published during 2013, which followed items a) and b) above. It contains proposed measures at a local level that will help to reduce flood risk in the most 'at risk' locations. All measures included within the plan have been developed in line with the categories and associated guidance set out by National Resources Wales; that is:

- Preparing
- Preventing
- Protection
- Recovery and Review
- 5 The guidance is designed to ensure that NRW are able to publish the flood risk management plans prepared by the lead local flood authorities across Wales in a consistent manner.
- 6 The Flood Risk Management Plan covers flooding from surface water, ordinary water courses, ground water and the interface with river flooding. Flooding from main rivers, reservoirs and the sea remains the responsibility of NRW and their proposals can be found within the Western Wales River Basin Flood Risk Management Plan.
- 7 The draft plan has been subject to public consultation over a 6 week period, with a report on the consultation being written and included as an appendix of the FRMP.
- 8 With respect to developing Flood Risk Management Plans generally, an Officer steering group meets approximately quarterly to review progress and allow the representatives of the LLFAs to share best practice.
- 9 An Executive Summary of the draft Flood Risk Management Plan 2015-2021 is attached as Appendix A, which contains an on-line link to the full document.

#### Financial Impact

10 There is no direct financial impact as the proposed measures and schemes contained within the plan, with respect to the Council, are subject to the identification of resources to be considered as part of the service business plans and works programmes.

#### Equality Impact Assessment

11 A Screening Assessment has been undertaken to assist the Council in discharging its Public Sector Equality Duty under the Equality Act 2010. After completing the assessment it has been determined that this proposal does not require an Equality Impact Assessment.

## Workforce Impacts

12 None

#### Legal Impacts

13 Production of a Flood Risk Management Plan is a legislative requirement

#### **Risk Management**

14 Failure to proceed would mean the Council is not in a position to submit a plan to NRW by the December deadline.

The plan contains proposals to reduce the risk of flooding in "at risk" locations. However, as stated, the actions attributed to the council are in part subject to identification of resources and adoption of the plan may raise expectations in this regard.

#### Consultation

15 Public Consultation on the draft FRMP ran from the 21<sup>st</sup> September until the 2<sup>nd</sup> November 2015. A total of 8 responses were received, all of which have been considered. The comments received and actions in response are given in Appendix B. NRW must publish FRMPs prepared by themselves and LLFA's by 21<sup>st</sup> December 2015 and report information to the European Commission (EC) by 22 March 2016. To ensure they fulfil their role, NRW will undertake a formal review of the FRMP on final submission. During the public consultation period, NPT and NRW officers were in contact to ensure that the requirements covered by the formal review were met. This also resulted in some minor changes being suggested by NRW which have now been completed. Details of these changes are contained within Appendix B.

#### Sustainable Development

16 Reducing flood risk has a role to play in promoting Sustainable Development, facilitating development in flood risk areas, reducing transport disruption and the like arising from flooding, and avoiding damage to property along with the associated distress that causes.

## Appendices

17 Appendix A - Draft Flood Risk Management Plan Executive Summary which contains an on-line link to the full draft document.

Appendix B- Consultation Feedback

#### Reasons for Proposed Decision

18 To enable the Council to fulfil its duty as Lead Local Flood Authority.

#### Recommendations

19 It is recommended that Members approve the attached Flood Risk Management Plan Executive Summary and linked full document for submission to NRW prior to the 21<sup>st</sup> December deadline.

#### List of Background Papers

20 Environment and Highways Cabinet Board Report, 17<sup>th</sup> September 2015, Flood Risk Management Plan.

## **Officer Contact**

- 21 Glenn Watkins Drainage Manager Streetcare Services 01639 686038 g.l.a.watkins@npt.gov.uk
- 22 Steve Owen Highway and Drainage Services Manager Streetcare Services 01639 686304 <u>s.owen@npt.gov.uk</u>
- 23 Mike Roberts Head of Streetcare Streetcare Services 01639 686966 <u>m.roberts@npt.gov.uk</u>

## Flood Risk Management Plan 2015 - 2021

#### Executive Summary

This document has been prepared by Neath Port Talbot County Borough Council in consultation with its flood risk partners in its role as a Lead Local Flood Authority to provide a coordinated response to flood risk within our communities.

The plan is the final process in a series of actions laid out under the Flood Risk Regulations 2009 which required the preparation of:

- A Preliminary Flood Risk Assessment
- Flood Hazard and Flood Risk Maps
- A Flood Risk Management Plan

It sets out how NPTCBC will, in conjunction with stakeholders as appropriate, manage flood risk over the next 6 years to ensure that economic, social and environmental benefits are maximised against the context of available resources. Furthermore, the plan takes forward the objectives and actions set out in our Local Flood Risk Management Strategy (published in June 2013) and the objectives set out in the Welsh Government's National Flood and Coastal Erosion Risk Management Strategy. These objectives focus on reducing the adverse consequences of flooding on human health, the environment, cultural heritage and economic activity. The plan highlights the areas most at risk of flooding from surface water and ordinary watercourses within the County Borough, draws conclusions from these risks, and sets out the proposed mitigation measures.

#### Preliminary Flood Risk Assessment and Mapping

A Preliminary Flood Risk Assessment was carried out in order to establish the level of flood risk across the area. The process looked specifically at flooding from surface water, ground water, ordinary watercourses and the interface with flooding from main rivers (Main river flooding itself remaining the province of NRW). In order for a consistent approach Welsh Government has identified a number of key risk indicators and associated thresholds to establish significant risk and to determine the existence of Flood Risk Areas.

The methodology was based upon the flood risk maps produced by the NRW to identify one kilometre squares where the flood risk exceeds a defined threshold. Furthermore the key flood risk indicator for establishing an indicative Flood Risk Area was set as the number of people at significant flood risk being greater than five thousand. As a result, an Indicative Flood Risk Area was identified within Neath Port Talbot covering 60km<sup>2</sup>, (i.e. less than 10% of County Borough area) as shown on the following plan. (See overleaf)

It is noted that under the Flood Risk Regulations 2009, a Flood Risk Management Plan need only be prepared for an Indicative Flood Risk Area however, for completeness; the Council has expanded its researches to cover the whole County Borough.

## Figure 1: Indicative Flood Risk Areas within Neath and Port Talbot County Borough

Type of Risk	Totals For NPTCBC	Totals For Flood Risk Area
Risk to People		
Residential Properties		
~~Properties	63764	35614
~~People (multiplier 2.35)	149845	83693
Services	132	57
Risk to Economic Activity		
Non-Residential Properties	16471	7154
Airports	0	0
Motorway/Trunk Roads km	105	50
Mainline Railways km	86	35
Agricultural Land - Grades		
1, 2 & 3 <i>ha</i>	951.00	214.00
Risk to Natural & Historic Environment		
Bathing Waters	2	1

Scheduled Ancient		
Monuments ha	123.00	18.00
Listed Buildings	388	178
Licenced Abstractions (LA)	50	14

Overview of assessed Surface Water Flood Risk for the County Borough

It is noted that the flood risk from surface water in NPTCBC as determined by modelling may be overstated as figures include properties, infrastructure and land at risk from flooding, and the

modelling by NRW does not incorporate the capacity of existing surface water culverts.

Communities assessed as most at risk from surface water flooding in Neath Port Talbot

Table 1: Communities most at Risk within the Indicative Flood Risk	Ś
Area	

Community	Percentage of Properties at Risk of Flooding	Number of Properties at Risk of Flooding	Population	Number of People at Risk of Being Flooded
ABERAVON	42.05%	1092	6103	2566
NEATH EAST	27.12%	879	7616	2066
BAGLAN	6.47%	853	7231	468

GWYNFI	1.04%	7	1589	16
ALLTWEN	0.41%	4	2308	9

Local measures have subsequently been proposed for each area to reduce the risk of flooding, and provide a balanced approach to flood risk management across the borough. These measures cover the statutory action categories of Prevention, Protection, Preparedness and Recovery/Review within the Indicative Flood Risk Area. It is important to note that the percentage of people and properties at risk of flooding is not the only risk issue. Infrastructure, the natural and historic environment, and economic issues also need consideration and are reflected in the site specific actions contained in the plan. In general the proposed measures have been selected to ensure:

- Our communities are prepared for potential flood events;
- prevention and protection measures are in place to reduce the associated risks and hazards, and
- A recovery and review process is established to aid those in need and help the authority and communities to learn from their experiences.

The assessment and issues for each electoral ward are given in the main document, which can be viewed via the following link:

www.npt.gov.uk/pdf/FloodRiskManagementPlanMaster.pdf

#### Existing flood risk management measures

Existing management measures include the following main service areas:

- The regular maintenance of existing structures, watercourses, drainage systems and other related infrastructure, to ensure the systems already in place work as efficiently as possible.
- Advance warning of significant rainfall events as provided by a subscription service forecast and coordination of effort with partners.
- Data Capture and management using a Geographical Information System including mapping of existing infrastructure, logging of repairs and flooding incidents, plus recording any new systems or infrastructure as they become active.
- Reactive maintenance and/or cleansing of gullies and culverts, including responding to reported problems or incidents.
- The identification and prioritisation of flood alleviation schemes, and the seeking of funding for these.

It is noted that in general, experience has demonstrated that the most likely source of flooding within the authority is from blocked culvert grids and intakes; therefore considerable emphasis has been placed on this aspect of drainage. Details of Critical and High Priority Intakes are given in the Appendices.

#### Measures to Mitigate Flood Risk

The general priority actions over the life of the plan are:

#### NPT01 Flood Warning Service:

Investigate how a flood warning service can be developed, employed, implemented. This includes a feasibility study to establish whether the service can be linked into social media and if it is viable for flood risk warning, severe weather warnings, etc.

#### NPT02 Survey Work:

Locate, record and map every outstanding part of the county's drainage infrastructure. Identify how this infrastructure combines with Dŵr Cymru Welsh Water systems and riparian systems. Furthermore, record the physical details and condition of each component, and develop the Authority's Geographical Information System and Asset Records.

#### NPT03 Derive Hydrology for catchment:

Carry out inspection and survey of catchments, watercourses, culverts and surface water drainage networks. Build hydraulic models from the information gathered through investigation and survey where required in line with priorities.

NPT04 Carry out investigation of accumulations of surface water:

Investigate areas identified by the flood risk maps as being at a high level of flood risk. Understand the specific sources of flood risk within these areas and identify measures to mitigate the risk if it is validated by the investigation.

#### NPT05 Flood Asset Inspections:

Develop a structural inspection programme for flood structures/features. These inspections will involve identifying the general condition of the flood structure/feature and making recommendations based on the outcomes.

#### NPT06 Flood Asset Maintenance:

Continued scheduling and undertaking of maintenance on NPTCBC's flood defence and water conveyance assets. This involves activities such as grid cleansing, de-silting and channel clearance to allow for the drainage systems to work at maximum capacity. Scheduling the maintenance regime will ensure those areas most at risk are prioritised to minimise the flood risk. A review is also required of internal culvert cleaning frequencies for all critical and high priority sites to determine any desirable improvements and associated costs/resource needs.

#### NPT07 Liaison with Owners of Significant Flood Assets

Establish contact with land owners where flood defence assets are situated including, but not limited to, riparian owners, DCWW, Network Rail, SWTRA and various Canal Companies. Agree maintenance and inspection regimes for the assets so that there are no choke points in the system.

#### NPT08 Awareness Raising:

Development of a toolkit to assist in raising community awareness and preparation for flood and coastal erosion risk.

Furthermore, there is a general intention to take forward the wider range of measures identified in the Flood Risk Management Strategy published in June 2013, and pursue funding wherever possible to take actions forward.

#### Areas at higher risk of flooding and specific mitigation measures

There are limited resources available and it is therefore necessary to prioritise the Council's efforts. Based on a threshold of more than 100 properties at risk of flooding, the following priority areas and individual specific mitigation measures have been identified.

Aberavon: Specific actions include:

Baglan Way Ditch – An important link to the drainage infrastructure for the area, partly riparian ownership: Establish contact with land owners and ensure regular maintenance.

Dunraven Street/Corporation Road/Marsh Street – Welsh Water combined system with a history of flooding; Liaise with Welsh Water to ensure future inspection and maintenance.

M4 culvert near Sunnycroft Roundabout – SWTRA owned: Critical link in the Pentwyn drainage network which drains a large percentage of the community. Continued liaison with SWTRA.

[There are also coastal defence works proposed in Sandfields wards, although these fall outside of the remit of the plan.]

**Neath East:** Specific actions include:

Penrhiwtyn Area – Welsh Water combined system (M24) – liaise with WW to improve/ensure continued maintenance.

Network Rail – own and maintain the ditch alongside A48. Liaise as required to ensure on-going inspection and maintenance.

Gardener's Lane inlet – review priority and on-going maintenance.

St. Catherine's Close Inlet – recent capital scheme was done to improve flow rate and reduce flood risk on Briton Ferry Road. Review outcome.

Melincryddan Area (M24) – Primarily DCWW owned combined sewers. Liaise with DCWW as required to ensure on-going maintenance.

**Baglan:** Specific actions include:

Baglan Brook Improvement Phase 2, estimated cost £1M (80% of Phase 1 works to Pentwyn culvert completed in 2015), along with continued liaison with SWTRA and Network Rail)

Glan Hafren inlet – potential for a flood alleviation scheme identified and to be investigated. Gully maintenance also important in this area.

Heol y Nant – Investigate to locate outfall (Pant-yr-Arian Lane)

Fairwood Drive & Elmwood Drive – Investigation of flood risk required.

#### **Glynneath:** Specific actions include:

Rock Street, Lancaster Close and Addoldy Road drainage improvements – estimated cost £1m

#### Briton Ferry East: Specific actions include:

Regent Street East & Villiers Street: Under railway bridges – Network Rail own and manage pumps. Liaise with NR to ensure maintenance. Flood conveyance assets in the vicinity of Regent Street East & Rockingham Terrace are reliant on a Welsh Water combined network and continued liaison required.

Craig-y-Darren small watercourse requires further investigation.

Inlet on Craig Road: further investigation required.

JK's Inlet to be reviewed for priority status.

Ynysmaerdy system: There is a history of flooding and a culverted watercourse drains part of the estate into it, and then goes to Neath South Outlet: Choke Point in system and possible heavy siltation – Further investigation required.

Pumping station at rear of Herne Street – owned by Welsh Water, continued liaison required.

Grandison Brook: A Project Appraisal report for Grandison Brook was carried out in January 2010. A proportion of Option 3 identified in the PAR involved cleansing and improvement works to the channel downstream of the A474, estimated at £100,000. This work has recently been undertaken at a cost of circa £40,000 with over £10,000 being recharged to the responsible land owners.

Pont Howell Ddu inlet: Assessment required.

**Neath North:** Specific actions include:

Maintenance of Gnoll Interceptor.

Fairyland House Inlet– Liaison with owner required to ensure maintenance.

#### Taibach: Specific actions include:

Tal-y-Wern – Further investigation required to establish if the flood maps give a good representation.

Prince Street/Duke Street Inlet known surface water flooding – interaction with Welsh Water sewer system and Network Rail culvert. Further investigation.

#### Briton Ferry West: Specific actions include:

Church Street under bridge: long history of flooding. Network Rail owned. Continued liaison required.

#### **Blaengwrach:** Specific actions include:

Liaise with NRW which has responsibility, concerning Nant Gwrach particularly covering the area where it passes through the southern part of the village on its way to the Neath river.

Investigation of flood risk and measures on the north side of the A465, at the site of the Leisure Centre and surrounding housing.

**Ystalyfera:** Specific actions include:

There are known flooding incidents at Alltygrug Farm Road via overland/pluvial flows. Clyngwyn Road Disused tip – several culverts within and around this locality. Define land owners and establish a maintenance regime.

Investigate and verify the high risk flooding at Varteg Road and Heol Ynysdarren.

Bryn & Cwmavon: Specific actions include:

Heol Crwys & Depot Road – known flood risk areas. Continued maintenance of the culverted watercourse and pumping station is of high priority. Alleviation schemes estimated at £350k and £360k respectively have been identified but are subject to funding.

### **Other Priorities**

In addition to the above there are other proposed actions driven purely by maintenance and economic development needs. These include: Days, Dyffryn – complete system improvements –  $\pounds$ 270k Harbour side – flood mitigation scheme required – Estimated at circa  $\pounds$ 1m

It is noted that all actions within the plan are subject to identification/sourcing of funding.

## **APPENDIX B**

Feedback	comments	Feedback
ID		
1	No comment left	
2	We have severe flooding outside our property whenever there is a sudden heavy downpour or prolonged rainfall. The drains can't cope. I have video and photos of the last major flood. We live on a very busy main road and not only is this a hazard to motorists but also to pedestrians. The drain cannot cope with the amount of water, which is then made worse by the derelict building across the road. Water is just pouring onto the main road. We were told in January that once the new financial year started that they would come and sort out the drains. It is now coming into winter again and nothing has been done!! We pay a heavy council tax here. Please consider what service we are getting back in return? Flood risks to our property!!	These comments relate to a localised drainage issue and do not fall within the scope of the FRMP. As such this matter has been referred to the Drainage Team for a response and will be addressed privately with the respondent. In the event of work being required, any such work will be programmed in line with the Council's Annual prioritisation of schemes.
3	I have resided at the above address for 48 years. In this time I have witnessed the Rivers Afan and Pelenna which confluence at the end of my garden in full flood. Not once have I experienced any flooding caused by the rivers on my property nor felt the desire to move home until now. entering Pelenna my wife and I are in constant fear of the banks of the river bursting. Two years ago following an inclement spell of constant rain the banks of the river were on the verge of breaking up. Fortunately this did not occur, but the present proposals mean that the residents living in Dan y Bont feel under threat to move house after many years of happy safe living. Please would you express our concerns to those who are planning to change our environment and accept responsibility for the safety of the people and their properties.	These comments relate to a localised drainage issue and do not fall within the scope of the FRMP. As such this matter has been referred to the Drainage Team for a response and will be addressed privately with the respondent. In the event of work being required, any such work will be programmed in line with the Council's Annual prioritisation of schemes. The rivers are both the province of the NRW and as such this comment will also be forwarded to their office.

The following table contains the itemised feedback from the Public Consultation

4	<ul> <li><i>Translated from a Welsh language letter:</i></li> <li>I am writing regarding the above in the village of Lower Brynamman.</li> <li>The River Amman is shown as "Serious flood risk" and an elderly lady living in Amman Cottages has been refused insurance to the house recently.</li> <li>Another pensioner is greatly concerned if he will be rejected in November.</li> <li>Ecclesiastic Insurance has refused insurance to the Old Hall on the Carmarthen side because the River Amman will be shown as "substantial flood risk".</li> <li>I've lived here for 47 years and postcode to my home is SA18 1SN. Because of this can you look into our situation when Insurance companies use these maps showing flooding.</li> <li>I do not think it will be possible for the river to overflow, but he wants the matter to be looked into. In January 1969 we had a landslide when opencast Pengors was working and the majority of the residents had to be moved out. The landslide was behind our home.</li> </ul>	These comments relate to a localised drainage issue and do not fall within the scope of the FRMP. As such this matter has been referred to the Drainage Team for a response and will be addressed privately with the respondent. The river is the province of the NRW and as such this comment will also be forwarded to their office.
5	Having lived in the Glynneath area for 50 years I was amazed to hear that the highest number of properties at risk from flooding in the NPT area is at Glynneath. How were these figures arrived at? Has the local Authority challenged these figures in any way? Did the person who produced the results take into account the large amounts of money spent on constructing the Glynneath Flood Prevention Scheme? I have also spoken with Glynneath residents who have now been informed they live on a flood plain, in reality there has never been any flooding at these locations.	Glynneath and the majority of the lower Neath Valley are considered within the Flood Plain of the River Neath. The figures were provided by NRW and their derivation and accuracy are all explained in the Appendices of the FRMP. The numbers have not been challenged as they are being employed nationwide. The flood prevention scheme was an NRW scheme to address the risk of river flooding, which is not within the scope of the FRMP.

6	Responder would like to see solutions to flooding problems affecting his land caused by the actions taken by various landowners, third parties and developments, which over the years have contributed to increased water flow onto the responder's land.	These comments relate to a localised drainage issue and do not fall within the scope of the FRMP. The concerns are known to the Authority and are currently under investigation by the Development Control Team.
7	My elderly mother lives on Heol-y-Nant, Baglan, Port Talbot and has been forced to move out of her home twice due to flooding. She now has poor health and ensuring the prevention of further flooding is critical. NPTC has carried out major work on the culvert to minimise further flooding of the estate. I am therefore very disappointed that my mother's bungalow is still liable to be flooded due to a problem with the main sewerage system. This has been identified by several camera surveys carried out by Welsh Water, no action has been taken to rectify this.	These comments relate to a localised drainage issue and do not fall within the scope of the FRMP. As such this matter has been referred to the Drainage Team for a response and will be addressed privately with the respondent. Welsh Water acknowledge ownership of the problem.
8.	Neath Port Talbot County Borough Council – Flood Risk Management Plan Consultation Draft LLFA FRMP Review comments from NRW These comments have been collated based on an internal consultation with a number of different teams. Please find below draft comments in relation to the compliance of the Neath Port Talbot County Borough Council draft Flood Risk Management Plan with requirements as set out in domestic legislation (The Flood Risk Regulations 2009) or European legislation (The Floods Directive 2007/60/EC). The final review will be undertaken by NRW in accordance with the before mentioned legislation once the final version of the FRMP has been submitted to NRW. Note - page numbers stated within the text refer to those contained within the document itself rather than the pdf page numbers.	

8.a	There is a map included on page 14 that shows the boundary of the flood risk area. Additional comment in relation to the map on page 13 - you may wish to consider updating this map as it is branded EAW. <i>Initial review of this draft has</i> <i>deemed this appropriate to meet the requirements</i> .	No change required, map was produced by EAW, albeit this now forms part of NRW
8.b	There are Borough wide conclusions on page 17. These are very high level. There are more conclusions on page 36 which slightly expands on page 17 and there are also conclusions included against each community area in the appendix which in some circumstances includes more detail on severity and reasoning. Some communities are not detailed but others are. It is suggested that more description is added to those conclusions included on pages 17 and 36 to better describe the risk. <i>Initial review of this draft has suggested that</i> <i>minor amendments are needed</i> .	Additional Conclusions and Information added to P.36
8.c	The objectives from the local Flood Risk Management Strategy are included on page 30. It is not clear that these Objectives have been adopted for the FRMP. If they have, the plan should state that these Objectives have been adopted for the FRMP and are now the FRMP Objectives also. It does state on page 32 that the measures are to deliver the Objectives from section 7.2 and each measure is linked to relevant Objectives, but there needs to be a statement before the Objectives that these are FRMP Objectives now too. <i>Initial review of this draft has</i> <i>suggested that minor amendments are needed</i> .	Section 7.0 -Line added stating LFRMS Objectives are adopted as FRMP Objectives
8.d	County wide measures are included on pages 38 to 43 and are linked to Objectives. Measures include required fields for EU reporting - code, name, description, type, location, objectives, responsible authority, timescale, implementation status. Each community area is then linked through to the community measures. <i>Initial review of this draft has deemed this appropriate to meet the requirements</i> .	After consulting with NRW, it was decided that no changes were needed.

8.e	The review of the FRMP will be undertaken formally every six years. NPT will undertake an internal review annually to check progress. <i>Initial</i> <i>review of this draft has deemed this appropriate</i> <i>to meet the requirements</i> .	No changes required
8.g	There is currently a description of consultation from pages 52 to 53 which outlines the method. This will need to be updated with a report on Consultation for the final plan.	<u> </u>
8.h	Pages 27-30 include a statement that NPTCBC has examined the objectives and measures in the River Basin Management Plan (RBMP) and has selected measures in the FRMP that have regard to and do not conflict with the RBMP. It is noted that none of the new measures link to any of the RBMP measures. Considering the list of measures already under way from the LFRMS, some of these will deliver against the RBMP Objectives and Measures (NPT09 - SMPs, NPT18-SUDs, NPT19 - Land Management) therefore it is suggested that you consider making the links between these measures or objectives to strengthen the link between your FRMP and the RBMP. Note: The link to the RBMP will need updating before publication. <i>Initial review of this draft has suggested that minor amendments are needed</i> .	Each measure has now been individually assessed against those contained within the Western Wales RBMP to identify direct links between the measures. Where these have been identified they have been included within section 8.1.3.
8.i	Mention or reference to the SEA/ HRA seems to be missing from the plan. If the SEA is being adopted from the LFRMS, this needs to be stated that this is the case. If undertaking SEA, this needs to be submitted with the final plan.	Reference to SEA/ HRA in Section 3.3.7

## Agenda Item 13

#### **ENVIRONEMNT AND HIGHWAYS CABINET BOARD**

#### REPORT OF THE HEAD OF CORPORATE STRATEGY AND DEMOCRATIC SERVICES

#### 10 DECEMBER 2015

#### **SECTION B – MATTER FOR INFORMATION**

#### WARDS AFFECTED: COEDFFRANC WEST

#### OFFICER URGENCY ACTION – EXPERIMENTAL TRAFFIC ORDERS – ELBA CRESCENT/BALDWINS CRESCENT, CRYMLYN BURROWS

The following urgency decision has been determined by the Head of Engineering and Transport in consultation with the requisite Members, for immediate implementation. There is no call-in of this matter.

**Urgency Action No: 1271** 

Date: 27 October 2015

# Re: To advertise the Legal Orders for the implementation of Traffic Orders on Elba Crescent and Baldwins Crescent, Crymlyn Burrows.

The Urgency Action sought to obtain approval to advertise the Legal Orders for the implementation of Traffic Orders on Elba Crescent and Baldwins Crescent, Crymlyn Burrows, due to parking issues following the opening of the Swansea Bay Campus. The Traffic Orders are necessary in the interests of road safety, and the scheme would be funded by the University Bay Campus Section 106 Agreement.

**RESOLVED:** that the report be noted.
