# Regeneration and Sustainable Development Scrutiny Committee (Remotely via Teams)

Members Present: 3 December 2021

Chairperson: Councillor S.K.Hunt

Vice Chairperson: Councillor R.L.Taylor

**Councillors**: D.Cawsey, H.N.James, S.Pursey, S.Rahaman,

N.T.Hunt and S.A.Knoyle

Officers In C.Morris, S.Brennan, A.Griffiths, H.Jones, Attendance: J.Woodman-Ralph, L.Beynon, N.Chapple,

A. Collins and C.Plowman

Invitees: Councillors A.Wingrave, L.Jones, C.Clement-

Williams, N.J.E.Davies, J.Jones, S.Jones and

S.H.Reynolds

# 1. Declarations of interest

The following Members made a declaration of interest:

Cllr. S. Pursey - Re. Cabinet Board Agenda Item 8

- Active Travel (Wales) Act 2013 - Review of the NPT Active Travel as he took part in the consultation

and his responses and

suggestions were among those to

be approved in the report.

# 2. Minutes of Previous Meeting

The minutes of the meetings held on 17 September 2021 and 22 October 2021 were approved.

# 3. Rhondda Tunnel Society Presentation

Members received a presentation from the Project Secretary and the Chair of the Rhondda Tunnel Society; the presentation detailed the following three main themes:

- Project costs;
- Creating a 'must visit' attraction;
- Plans to move the project at Blaengwynfi forward.

It was noted that a technical subcommittee had been established, and was made up of retired Senior Engineers; the subcommittee had produced detailed plans for the tunnel, which had been endorsed by the Associate Director of Arup in Cardiff.

The Committee was informed that the physical work of the project will take 18 months; and the project costs included the following:

- Visitor Centres at both ends of the tunnel;
- Micro-hydro schemes at both ends of the tunnel; the Society
  was working with Natural Resources Wales (NRW) to develop
  these. It was added that the Micro-hydro schemes will provide
  green power, and will also provide the opportunity to put in
  place remote working facilities in the Visitor Centres.

The Project Secretary of the Society confirmed that the project cost had been validated by Corderoy, Quantity Surveyors; and the estimate given for the overall project was £13.111million.

Members were informed that South Wales had two abandoned long railway tunnels, one situated between Abernant and Merthyr, and the other in Rhondda, Blaengwynfi; Rhondda Cynon Taf (RCT) Council had a portal in both tunnels. It was stated that the Abernant-Merthyr tunnel was an active travel route between Merthyr and Aberdare, and the Rhondda tunnel was more of a visitor attraction and would be the longest tunnel in Europe. In regards to the Abernant-Merthyr tunnel, it was noted that it had continued with public funding but has received little public support; however Merthyr Council continues to lobby hard for support. The Project Secretary explained that the Rhondda tunnel had received huge public support, however, has received very little public funding in the last few years; strong support from Neath Port Talbot (NPT) Council could help balance this.

The following points were highlighted in regards to the current situation:

- Both tunnels were owned by the Westminster Department for Transport (DfT);
- The DfT confirmed they will transfer the tunnels to Welsh Government with a small sum; £60k for the Rhondda tunnel, however Welsh Government wanted several million pounds for it;
- Chris Bryant, Member of Parliament (MP), was going to be approaching DfT on behalf of the Welsh Government for funds;
- RCT Council were in the process of recruiting a consultant to work on writing an application through the Heritage Lottery Fund for £5million specifically for the Rhonnda tunnel.

A video was played to the Committee, which showed Chris Bryant MP in Westminster, inviting Grant Shapps MP to visit the Rhondda tunnel.

It was stated that the middle of the Rhondda tunnel was dry and mild all year, and it had 526 alcoves which provided many opportunities; the tunnel offered a huge exhibition space, and one idea was to use the alcoves for interactive displays of Welsh history. It was added that some displayed could be sponsored, and there was a lot of interest from the National Library of Wales; those working on the project had many different ideas, and welcomed further ideas to be presented. Another suggestion highlighted was to use the bare walls for sound and light displays.

The Committee were presented with plans for the proposed display section of the Rhondda tunnel; there were plans to put a removable barrier down the middle, to widen the tunnel out to its full width (4.3 meters) and to allocate a side for pedestrians to walk down with alcove displays, and the other side for cyclists to use.

Members were informed of the plans to extend the tunnel slightly, which will make the tunnel over two miles long; it would take an hour to walk from one end to the other. It was noted that developing such a long tunnel would be a challenge and needed to be considered carefully, however it would be special for South Wales; this was why there was a lot of emphasis on the facilities/displays in the tunnel, as these elements will make it more than Europe's longest walking/cycling tunnel.

The presentation included pictures of the Rhondda tunnel site in Blaengwynfi from the 1970s and how it looked today; displaying how much the site had changed. It was mentioned that a deep hole was needed to access the tunnel portal, and from this there will be lots of spoil to be moved; the current plan was to excavate the approach cutting. Members were informed that a company called hyperTunnel had approached the Society with a new tunnelling technology to create an extension to the tunnel. The Project Secretary explained what the company would do to create much less disruption and spoil, and less change at Blaengwynfi; there was also plans to look into a "Cut and Cover" alternative which was more conventional.

Images were shared displaying the current plans and thoughts for the access point of the Rhondda tunnel; the extension would bring the tunnel portal to the surface, which would prevent the hillside from being disrupted.

A brief summary of the hyperTunnel technique was provided to Members; along with the detailed plans drawn up by the technical subcommittee. The detailed plans highlighted the amount of spoil that would need to be removed and deposited if the tunnel was excavated, and also if the tunnel was extended.

A discussion took place in regards to the ownership of the tunnel; a map was displayed, which highlighted the areas of land that NPT Council owned. It was explained that the majority of the tunnel, including the site for the proposed extension, was within NPT land; therefore, the future planning application will be presented at a meeting of the NPT Council Planning Committee.

The following points were highlighted in the summary of the presentation:

- The Rhondda Tunnel Society had been campaigning since 2015:
- There had been huge political support, however endless reports and delays;
- The Society wanted to raise the funds for a Blaengwynfi extension, independently of public funding;
- The air shaft could be opened for abseiling to bring in visitors before the main tunnel opened, which would start to bring in benefits while the rest of the tunnel was being developed;
- Tentative offers of some funding had already been received;
- Discussions had taken place with RCT Council regarding providing the "match funding", which was essential for most bids:

- The Society was still waiting for a full costing proposal from hyperTunnel. However, some estimates had been considered with regards to how much money it would cost to implement the "Cut and Cover" alternative;
- A letter had been received from the Railway Heritage Trust, who awarded a grant of £100,000 towards the reopening of the Blaengwynfi portal of the Rhondda tunnel. They had also offered further monies next year, although this needed to be confirmed in the budget they were negotiating with National Highways.

Members stated that it was refreshing to see the ambition and commitment to a project; however, mentioned that a lot of the progress will be determined by how much money the UK Government will be willing to commit. It was noted that going forward, it would be vital to keep an eye on the various funding streams and financial opportunities that could become available in the near future; Members were willing to help by lobbying local MPs.

The Local Members in attendance at the meeting provided their support for the project and commended the work that had been completed so far; Members also highlighted the importance of this type of project to the Afan Valley.

Members were informed of the various phases of work that were proposed; although it was noted that some of this would depend on the funding package between Westminster and Welsh Government. One of the first phases that was highlighted was to submit a planning application to open the portal at Blaengwynfi, in order to gain access to the tunnel; and then converting the air shaft into the abseiling element. It was stated that this will start the project, and the momentum was anticipated to be carried forward after this; there were various jobs that could be completed at a fairly low cost, while funds were gathered to complete the rest of the work.

It was queried whether the Society would need the ownership transferred from DfT before the development work can start; the work relating to the extension was situated entirely within NPT land, therefore the ownership would not need to be transferred to start this element of the work.

A discussion took place in regards to the link between the infrastructure and tourism of the project. It was confirmed that on the Rhondda side, there was a bus turning circle in Blaencwm which

would be of use; there was also a 20 minute bus service down the valley, which was within 400 meters of the portal in the Rhondda. In terms of future plans, it was noted that the Society was looking to include a traffic free cycle route to Treherbert station, and a shuttle bus for those who only wanted to walk one way through the tunnel; the shuttle bus would then take those individuals back to the start. It was added that the Society would also like to develop a hire bike route, which will spread the benefits right throughout the valley. The Project Secretary confirmed that the Society would work with NPT Council as much as possible, especially during the pre-planning stage, to discuss these elements.

Members thanked the Project Secretary and the Chair of the Rhondda Tunnel Society for their presentation and the work that had been put in so far to take the project forward.

### 4. Asset Sponsorship - Verbal Update

Officers provided a verbal update on the topic of Asset Sponsorship, covering two main areas; a status report on roundabout sponsorships and the progress made with Clear Channel who operate bus stops.

The Commercial Coordinator for the Council provided Members with background information on asset sponsorships; highlighting that it had been recognised over the years that there was potential income generation opportunities presented by assets such as roundabouts, roadside verges, lighting columns etc.

### Roundabout Sponsorships

Members were advised that after a tender process in 2011, the Council chose to outsource the management and sales function of providing advertising opportunities on roundabouts to generate funding, to a company called Immediate Solutions; the first advertisement was put up in Neath Port Talbot (NPT) in 2012, and in June 2017 the Council extended the contract for a further four years. It was noted that during the first few years of the contract extension, the revenues matched expectations; however, not long after, the revenue started to decrease.

It was explained that after consulting with various Members and Officers, the Council chose to hand in the three months' notice of contract termination to Immediate Solutions; it was felt that this work could be elevated by bringing it in-house, and various opportunities

for customers could be explored, as well as generating more income than what had been received previously.

The Committee was informed that at the end of June 2021, the contract with Immediate Solutions expired; since then the Council had been novating contracts over for the existing sponsored roundabouts, and establishing the portfolio and systems that needed to be put in place in order to offer those opportunities to local customers. The various benefits of operating this locally were highlighted; including being able to read the market to understand what businesses want to advertise, being able to respond much quicker when something goes wrong, and generating more income.

A summary was provided, in which the Committee was informed that the Commercial Coordinator had been in contact with potential customers for roundabout advertisement in the area, and had a number of orders lined up.

### **Bus Stop Advertising**

Officers explained that a company called Clear Channel currently sells the bus stop advertising in NPT; the Council owned the majority of the structures of the bus shelters in the County Borough, and Clear Channel own around 10.

It was stated that the Council had a replicable agreement in place with Clear Channel in which they were to maintain and repair any damages to the bus shelters that they used for advertisement; this was in return for allowing them to do so.

Members were informed that the Commercial Coordinator recently carried out research in regards to bus stop advertisement, and found that other Local Authorities received commission on them; following this, Officers proceeded to go through the relevant processes in order for NPT Council to obtain commission. It was highlighted that a recommendation had been made to re-sign a further five year agreement with Clear Channel, however this time with a set amount of money included as part of the contract; including a set annual fee for every poster that they wish to change to a digital screen. Officers stated that the digital screens were growing in popularity; the company had an ambitious roll out to change many of the posters in prime locations, to digital screens. It was added that Officers were moving forward on this recommendation; Senior Officers were currently looking over the detail.

### Other Key Areas of Work

In addition to the above, it was highlighted that the Commercial Coordinator had been speaking to small local businesses, and found that there were very few opportunities for them to advertise and promote themselves; for example, bus shelter advertisements were mainly utilised by national companies and were quite expensive. Officers mentioned that because of this, some small businesses will use illegal fly posters and/or banners to advertise. In order to reduce the use of illegal advertisement, Officers were hoping to create smaller, short term opportunities for local advertisement at a cheaper cost; the Council could manage the inventory and generate income from this, as well as supporting its local businesses.

A discussion took place in regards to the health and safety risks of the illegal forms of outdoor advertisement such as banners. It was confirmed that Officers were working on a policy which will cover all the relevant elements relating to this matter; however, enforcement of illegal signage went hand in hand with having opportunities to offer these business. It was added that providing local businesses with advertisement opportunities could help to reduce the amount of illegal advertisement; and the policy will provide consistency and assist in controlling the matters, and will be a document which all parties can understand and refer to.

Members asked if there was potential for income to be generated for sponsorships in other ways. Officers confirmed that there were endless opportunities of creating revenue; Local Authorities had a 100% reach of their audience, the residents of the area, and one of the main tasks was to find different ways to connect with them.

In addition to generating income, it was also noted that aiding communication between local businesses and local customers was important; Councils can create and sell opportunities independently, and by supporting local businesses, it helps to put the money back into the community.

It was highlighted that the work around asset sponsorship, and supporting local business provided the opportunity for individuals to obtain a sense of place and community; there were many benefits to this such as improving the local environment and adding links to tourism.

The Commercial Coordinator was commended for their hard work on asset sponsorships, and Members welcomed further updates in the future.

Following scrutiny, the update was noted.

### 5. **Pre-Decision Scrutiny**

The Committee chose to scrutinise the following Cabinet Board items:

Active Travel (Wales) Act 2013 - Review of the NPT Active Travel

\*Cllr S. Pursey reaffirmed his interest at this point and withdrew from the meeting for this item only\*

Members were presented with a report relating to the Active Travel (Wales) Act 2013; a Review of the NPT Active Travel.

It was highlighted during the meeting that information had been omitted from Appendix 3 of the circulated report. An updated version was circulated at the meeting and appended to the minutes for information.

The Planning Policy Manager provided a brief overview of the proposals contained within the circulated report.

The Local Member for Gwaun-Cae-Gurwen, in attendance at the meeting, had encouraged residents to get involved in the recent consultation; there was a lot of interest from them, and many did submit a response. However, they were disappointed to see that the high priority areas appeared to be in the populated areas; the importance of having more connectivity in the valley communities was highlighted, and concerns were raised in regards to the conflicting policy developments.

Officers made reference to the Welsh Government Prioritisation Matrix which was used as a guide to score the routes by using a criteria, which was detailed in the circulated report; the scoring system was automated via a GIS system, and the resulting scores determine whether a route was prioritised as a high, medium or low priority. Members were informed that this system was indicative, and it was confirmed that Officers had liaised with Welsh Government to see if this could be changed; Welsh Government informed Officers that the system was simply a tool for Councils to use. The circulated report proposed a further two week consultation, to inform the public of the classification and prioritisation of the routes; and to gather

comments from the communities with regards to this, which Officers will take on board.

Additional to this, it was stated that there will be another, more detailed and robust, assessment which will look in detail at elements such as; if the route has planning permission, the land ownership, and the impacts on biodiversity.

Officers reassured Members that there was scope to add in strength of feeling and local need, and hoped that the extra two week consultation will achieve this; ideally Officers would have liked to extend this period, however, the timescales and deadlines for this work were extremely tight and fast approaching. It was noted that the next few weeks would be important in terms of gathering further comment from communities, in order to identify particular routes that may stand out, especially in the valley areas.

It was acknowledged that since the Active Travel (Wales) Act was established, the focus of the funding had been allocated to built-up areas such as town centres; these areas had the biggest impact, and were places in which Active Travel could be easily achieved. However, it was mentioned that the Council had a role to identify where gains could be achieved in the more isolated communities; conscious efforts had been made, through the various stages of the maps, to try and better connect the valley communities.

Members were encouraged to signpost their constituents to the additional two week consultation, which will capture final comments on the Active Travel routes.

Following the presentation that was received earlier in the meeting on the Rhondda Tunnel Project, Members highlighted that there were no significant Active Travel routes linked to this location. Officers explained that they had been involved in discussions with the Rhondda Tunnel Society regarding this matter. It was noted that Active Travel had a specific meaning in Wales; it facilitated short distance, purposeful journeys to places such as schools and shops. Members were informed that the Rhondda tunnel site was more tourism related, and on that basis it would be extremely difficult to justify the inclusion of routes based on the criteria and how the Act was written; routes that were only for tourism and recreational related purposes, did not align with the ideas and underlying principles of Active Travel. Officers added that there could be opportunities in the

future, which could boaster the argument for these schemes to be in place at these types of locations.

The Committee raised concerns with the current staffing issues in the service, and stated that additional resource could help Officers to achieve more out of the Active Travel agenda. The Head of Planning and Public Protection confirmed that resource was a significant issue at the moment. It was explained that the delivery of the Active Travel function in NPT Council was split between two services; the Planning Policy Service dealt with the strategic side in terms of the development of the maps, and the Engineering and Transport Service dealt with the delivery and implementation. It was stated that the Teams were currently discussing how the service could be improved internally; questioning if the delivery of the Active Travel agenda needed to be restructured or realigned. It was recognised that since the Act was established, the agenda had developed significantly; there was far more work required now.

It was asked if there would be a continued programme of funding from Welsh Government going forward with the Active Travel agenda. Officers anticipated that the funding would continue, and projected that the pot of monies available for Active Travel would likely increase due to the ambition to roll this out more extensively across Wales; the Active Travel was very much at the heart of Welsh Government policy and was embedded into a lot of what was being pushed out to Local Authorities. However, it was stated that the pot of money for this was finite as it was shared amongst all Local Authorities across Wales.

Furthermore, Members were encouraged to lobby Members of the Senedd; this could improve the share out of the money. It was noted that Officers had a role to ensure that the correct narrative was included when submitting the funding bids to Welsh Government, in order to support the bids.

Following scrutiny, the Committee was supportive of the proposals to be considered by the Cabinet Board.

# Key Performance Indicators 2021 2022 - Quarter 2

The Key Performance Indicators 2021/2022 for Quarter 2 were presented to the Committee.

Reference was made to the number of PM10 breaches in the Air Quality Management Area (Port Talbot / Taibach); Members asked for clarity on the figures included in the circulated report.

Officers informed the Committee that the actual target of exceedances each year was 35; the figures in the circulated report indicated that the Council was currently below the target. It was explained that the half of year target for 2021/22 was 18 breeches, and the Council was at 17 breeches. However, it was highlighted that the Council was experiencing more exceedances this year in comparison to the previous year; the Head of Planning and Public Protection had spoken to Officers regarding why this was the case. It was noted that Officers recently had a meeting with Welsh Government on this particular issue, and it was found that the likely source of the breeches were from TATA Steelworks; Welsh Government requested Natural Resource Wales (NRW), who were the regulators of the TATA operation, to investigate what the increases could be related to.

Members were informed that the investigation was still ongoing, and there was no obvious reasons for the increase that had been reported at this stage; NRW had suggested that it could be related to the fact that production had reduced on site, which could sometimes cause fugitive emissions from the stock piles. It was added that TATA had been asked specifically to treat those stock piles in case they were the source. Officers mentioned that there were also parts of the operation which would shortly need replacing or renewal; when these were actioned, the situated could be improved. Officers stated that the increase in breeches was a concern, however this was being closely monitored, and would continue to be through Quarters 3 and 4 of the reporting year.

It was highlighted that if the pilot study regarding the sensors that was currently underway was successful, it could allow for Officers to gain a better understanding as to the location of the localised pollution; this could assist as part of the investigation going forward.

Following scrutiny, the Committee noted the report.

# Neath Port Talbot Replacement Local Development Plan (RLDP) 2021-2036

Officers provided a report on the Neath Port Talbot Replacement Local Development Plan (RLDP) 2021-2036.

Members were pleased to see the inclusion of in person engagement, where appropriate, in the report; this provided a balance, and the ability to target a wider demographic, as not everyone was able to engage online. Furthermore, it provided the Council with much more

flexibility in regards to community engagement. Officers stated that the pandemic highlighted the need to be flexible and that circumstances can change quite quickly; the flexibility that had been built into the delivery agreement will ensure that whatever the circumstances at any given time, the Council will be able to engage efficiently with the community.

Officers reassured Members that the RLDP review would be comprehensive, and would look at every single topic that the LDP covered; it will also look at any policy areas that the Council did not have policy framework coverage for. It was noted that the LDP will be backed up by a significant amount of evidence; if the evidence suggests that a policy would be required, then the Council was duty bound to develop that policy accordingly.

A discussion took place in relation to the timeframe for submitting candidate sites; the Team were currently working on the candidate site assessment methodology and the guidance notes. It was hoped that these would be published on the website mid-January 2022; the call for candidate sites officially started in March 2022 and would run through until May 2022. It was mentioned that the register would be published in May 2022, after the Local Government Elections. Members were informed that the circulated report contained the full timeline of the RLDP.

Following scrutiny, the Committee was supportive of the proposal to be considered by the Cabinet Board.

# Transforming Towns Place Making Grant

Members were updated on the funding received from the Welsh Government to deliver the Transforming Towns Programme, South West Wales, Place Making Grant (TTPM).

It was asked if the Council had made preparations in order to make the most of the grant. It was explained that there was £4.5 million allocated to the Region; this provided NPT Council with around £1.1 million, however there was an opportunity to ask for more if needed. Officers predicated that the allocated amount would be spent, and more money may be required in order to deliver the projects that were lined up; some of these included renovating commercial premises, and some smaller jobs such as the markets and pop up shops.

The Team recognised that a lot of Welsh Government money was being allocated to the larger urban areas; Officers put forward a long list asking of proposed works in secondary settlements, such as Taibach, Skewen, Cymmer and Gwaun-Cae-Gurwen. However, it was noted that this was not backed up by Welsh Government, and Officers were told that they had to focus on the larger settlements. Members were informed that this did not prevent any other settlements from being put forward, if Officers were able to submit a strong case to Welsh Government; Members were encouraged to contact the Team if they had a specific case.

A discussion took place in regards to the digital agenda for transforming towns, and it was queried if the Transforming Towns Place Making Grant could be utilised for digital works. Officers stated that the circulated report looks at providing an understanding of how digital could be used to improve footfall and measure footfall etc.; and that the City Deal work was more aligned to the digital agenda, and will have its own funding streams to carry out some of that work.

The difficulty of applying and proceeding with grant applications was raised; Members asked if Officers were still able to meet the support needs for the businesses who were able to qualify for the grant. It was noted that Officers would help in whatever way they were able to; however, this was limited due to staffing hours and limited resources. Officers acknowledged the challenge, and mentioned that it was difficult to distribute the money; a lot of infrastructure needed to be put in place to ensure that the money was distributed fairly and fitted in with the criteria of the grant.

Officers confirmed that they would provide a follow up report outlining the funding opportunities that the Council was going to take forward and how the money was going to be used.

Following scrutiny, the Committee noted the report.

# 6. Forward Work Programme 2021/22

Members noted the Regeneration and Sustainable Development Scrutiny Forward Work Programme for 2021/22.

# 7. Access to Meetings

**RESOLVED:** that pursuant to Section 100A(4) and (5) of the

Local Government Act 1972, the public be excluded for the following items of business which involved the likely disclosure of exempt

# information as defined in Paragraph 14 of Part 4 of Schedule 12A to the above Act

### 8. Pre-Decision Scrutiny of Private Item/s

The Committee scrutinised the following private Cabinet Board item:

### Rhondda Tunnel Project Update

Members were provided with an update in respect of the Rhondda Tunnel Project.

The Chair summed up the discussions that had taken place; and highlighted that Members would need to determine which of the two options, contained within the circulated report, they would be recommending to Cabinet Board.

A formal amendment to 'Option B' contained within the circulated report was proposed and seconded:

For the time being, the Council should retain its current position, in so much as we will support the project in principle, providing advice where necessary to any third parties involved in the project, but will not take on any formal responsibility for future fund raising in respect of potential match-funding commitments. Neither will we assume any ownership of the tunnel, shared or otherwise, or accept any responsibility for future management of the tunnel, including any subsidy requirements. This position will be kept under review, and may be amended in the future, should the project progress towards delivery to the satisfaction of the Council and bring benefit to Neath Port Talbot County Borough with future reports being brought back to Members as appropriate.

It was determined that the Committee were in support of the amendment to 'Option B' to be considered by Cabinet Board.

#### **CHAIRPERSON**

### Appendix 3 - Draft classification and prioritisation of Active Travel routes

#### Classification of routes

Routes are designated by the importance of the connections they make within the network, they are classified into the following categories:

**Primary routes**: The key connections between neighbourhoods/residential areas and a town or city centre; routes between districts and neighbourhoods; links to main public transport interchanges; other cycle routes which are (or which have the potential to be) used by many cyclists;

**Secondary routes:** These link between the primary routes; links to trip attractors such as schools, colleges, employment sites; cycle routes which are an attractor for a more limited range of users; links to local public transport interchanges and stops; other routes which may cater for fewer cycle journeys than the primary routes but are still of strategic importance within the network Network planning and map preparation;

**Local routes:** All other all-purpose roads, greenways and bridleways that are not necessarily part of a designated route (e.g. many residential streets). This basic network of local routes, although lower in the hierarchy, forms an important part of the cycle network.
