

NPT's Social Services Plan for Neurodivergence (Autism and Other Conditions 2024 – 2027)

We are an ambitious Council and we are committed to ensuring that neurodivergent children, young people, adults and families have their diverse needs understood, get the right support when they need it, and have positive life experiences.

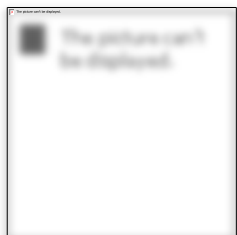

We aim to develop and support understanding across the County, where we work together with neurodiverse individuals and families to provide and commission services for the neurodiverse community as a whole.

Our ambition is for neurodiverse individuals to be recognised, understood, supported and included in their communities.

Awareness & Understanding

Raising awareness and improving understanding of neurodivergence across Neath Port Talbot, its communities, stakeholders and services.

Community & Service Support

Supporting neurodiverse families and carers to have their voices heard, their needs understood, and to be supported to lead fulfilling lives and achieve their personal wellbeing outcomes.

Collaboration Across the Community

We are committed to work collaboratively with stakeholders in promoting access to support services for individual and families. Partnership working will be achieved at a community and regional level.

Community Projects & Training

Supporting projects within the community, working towards a greater understanding and inclusion of neurodiversity. Utilise national training programmes along with specialist provision to promote opportunities across the community.
